Does my project involve HUMAN SUBJECTS?

YES

Is my project RESEARCH?

YES

Examples of Research that may not involve Human Subjects:
- Data or specimen only research when no access to a code or link that could allow identification of the individual
- Cadaver research when no access to private identifiable health information (PHI) about the deceased individual.
- Projects with a business or event focus (e.g. an interview of a grocery store manager about a particular brand of cookies and how well they sell).
