LETTER FROM THE PRESIDENT

Welcome to Pacific Northwest University of Health Sciences. As the president, it is my honor to invite you to visit our young and vibrant health care focused university. Located on a developing 65 acre campus in east Yakima, PNWU is an exciting new addition to the Central Washington educational scene.

PNWU is a nonprofit university founded in 2005 by a visionary and dedicated Board of Trustees. With generous support from the founders and many other donors across the Pacific Northwest, PNWU and its College of Osteopathic Medicine are flourishing. The vision of a medical university dedicated to core themes of academic success, health care professionals for rural and underserved of the northwest, and service to community brings talented faculty, staff and students to participate in the vibrant learning community.

PNWU is a catalyst for innovations in education and research for rural and community based medicine. Our initial College of Osteopathic Medicine has a mission to train compassionate and competent osteopathic physicians to fill the health care needs in the Pacific Northwest, especially in rural and underserved areas. With over 80 percent of our students coming from Washington, Oregon, Idaho, Montana and Alaska, we experience a wide diversity of interests, enthusiasm and positive energy on the campus. Our clinical training sites across these states provide excellent community-based medical education experiences.

This catalog is provided as a guide for you, our faculty, and staff to enable a full understanding of policies and procedures at PNWU and PNWU-COM. PNWU was founded on principles of high standards for learning and conduct to assure that our graduates exceed the public expectations for medical care-givers. Please join me in applauding and upholding this professional promise to your future patients.

Welcome to PNWU and PNWU-College of Osteopathic Medicine.

Sincerely,

Keith Watson, DO
President

ABOUT THE UNIVERSITY

MISSION STATEMENT
Pacific Northwest University of Health Sciences educates and trains health care professionals emphasizing service among rural and medically underserved communities throughout the Northwest. (Approved by the Board of Trustees on November 20, 2013.)

VISION
Continually improving the availability and quality of health care for those we serve.

CORE THEMES
- Academic Success
- Health Care Professionals for the Rural and Medically Underserved of the Northwest
- Service to Community

INSTITUTIONAL VALUES
- Mission Driven – Committed to create, sustain, and improve quality educational programs especially for rural and medically underserved communities
- Collaborative – Working together with thoughtful actions, efforts, and concerns to meet each opportunity, issue, or challenge presented
- Compassionate – Every individual is respected and treated with consideration, kindness, and understanding
- Genuine – Real people providing real solutions which have direct impact on community health, resources, and outcomes
- Student Focused - Unwavering support for every student empowers all to realize their full potential
- Healthy – At PNWU, you’ll learn what it means to be part of a healthy community, and how you thrive by being part of it

INSTITUTIONAL COMMITMENTS

Commitment to Students
While the University remains primarily committed to serving students from the Pacific Northwest, it encourages and welcomes students from all regions and cultural backgrounds. PNWU provides an opportunity for students to receive a high-quality education which focuses on the development of the whole person, including the intellectual, spiritual, social, and physical dimensions.

Commitment to Education
PNWU is committed to providing the highest educational offerings, emphasizing communicative and quantitative skills; independent thinking; tolerance of diverse
points of view; cultural, historical, and ethical awareness; and preparation for leadership, civic responsibility, and lifelong learning.

Commitment to Community and Region
PNWU is committed to enhancing the educational, cultural, and economic opportunities for the Pacific Northwest through its high-quality academic and continuing education programs, as well as its involvement in community service and humanitarian efforts.

HISTORY OF PACIFIC NORTHWEST UNIVERSITY OF HEALTH SCIENCES
In response to the growing health care needs of the Pacific Northwest, community leaders in Yakima, Washington, formulated a plan to establish a health sciences university with an initial focus on an osteopathic medical school. Pacific Northwest University of Health Sciences (PNWU) was founded as a 501(c)(3) corporation on February 16, 2005. In the following two years, those community members, several of whom became the original Board of Trustees, raised over $20 million in cash and in-kind contributions, primarily from the Yakima community. A portion of the 65-acre plot of land, which is the present site of the medical school, was one of the in-kind contributions. The capital raised established the financial reserves required by the American Osteopathic Association, Commission on Osteopathic College Accreditation (AOA COCA) to apply for accreditation for an osteopathic medical school.

The Washington Higher Education Coordinating Board (HECB) (now the Washington Student Achievement Council) authorized PNWU to offer the degree of doctor of osteopathic medicine (DO) in March 2007. Pacific Northwest University of Health Sciences College of Osteopathic Medicine (PNWU-COM) was granted applicant status from the AOA COCA on November 7, 2005 and pre-accreditation status in April 2007. PNWU-COM became the second of only two medical schools in Washington State and was the first new medical school in the Pacific Northwest in over 60 years.

The AOA COCA voted to award Initial Provisional Accreditation status to PNWU-COM at their August 25-26, 2007 meeting. This action established the initial class size of 70 students. That inaugural class matriculated in August 2008.

Ground breaking for Butler-Haney Hall, the first building on the PNWU campus, was held May 16, 2007, and the dedication ceremony to celebrate the completion of Butler-Haney Hall was held July 23, 2008. Less than two years later, construction of the Cadwell Student Center began. It was completed in February 2011. In the spring of 2012, the PNWU Board of Trustees awarded the contractor bid to undertake the expansion of Butler-Haney Hall which was completed just over a year later. The expansion delivered a 7,600 square foot auditorium which can be divided into two auditoria with occupancy of 200 individuals per side, additional offices, a larger library and simulation laboratory, and a café area for students. The campus continues to grow as evidenced by the University Conference Center which was completed in 2015.
PNWU received the Institutional Review Board/Independent Ethics Committee Registration from the US Department of Health and Human Services on April 27, 2009, which officially established the PNWU Institutional Review Board (IRB). This was a crucial first step in establishing the path to research at PNWU.

The COM was accredited by the AOA COCA in April 2012 and the inaugural class graduated a month later. With accreditation of the COM achieved, PNWU sought to expand the class size from 70 to 135 as part of the University’s plan to further address the physician shortage. The class size increase was granted and the first class of 135 students matriculated in the fall of 2013.

The University is always looking to expand its services. In November of 2014, PNWU was approved by the AOA to sponsor continuing medical education (CME) and is in the process of establishing an Institute of Interprofessional Education.

**ACCREDITATION**

**Pacific Northwest University of Health Sciences**

PNWU is an Applicant for Consideration of Eligibility with the Northwest Commission on Colleges and Universities (NWCCU). Applicant is an affiliate status indicating that an institution appears to meet the Commission’s conditions of eligibility and that its Application for Consideration has been accepted. Recognition as an *Applicant* neither implies nor ensures an institution will attain *Candidate* or *Accredited* status with the Commission.

Contact information for NWCCU:

Northwest Commission on Colleges and Universities
8060 165th Avenue N.E., Suite 100
Redmond, WA 98052
General phone: 425.558.4224

**College of Osteopathic Medicine**

PNWU-COM has been granted accreditation by the Commission on Osteopathic College Accreditation (COCA) of the American Osteopathic Association. Accreditation status is the highest level of accreditation awarded, and confers all rights and privileges of accreditation. Accreditation status is reviewed on a seven year cycle unless otherwise directed by the COCA for a shorter period. Renewal of accreditation is subject to an on-site visit. Once accreditation status is attained, the COM will retain that status until such time as it may be withdrawn by the COCA or may be voluntarily withdrawn at the request of the COM.

STATE AUTHORIZATION
Pacific Northwest University of Health Sciences is authorized by the Washington 
Student Achievement Council (WSAC) and meets the requirements and minimum 
educational standards established for degree-granting institutions under the Degree-
Granting Institutions Act. This authorization is subject to periodic review and 
authorizes Pacific Northwest University of Health Sciences to offer specific degree 
programs. Authorization by the Council does not carry with it an endorsement by the 
Council of the institution or its programs. Any person desiring information about the 
requirements of the act or the applicability of those requirements to the institution may 
contact the Council at P.O. Box 43430, Olympia, WA 98504-3430

NOTICE OF NON-DISCRIMINATION
PNWU is an equal opportunity employer and makes employment and student 
application decisions on the basis of merit. PNWU strives to have the best available 
student and individual in every position. The University shall not discriminate against 
faculty, staff, volunteers, students, or applicants on the basis of race, ethnicity, color, 
sex, gender, religion, national origin, age, disabilities, sexual orientation, marital status, 
or any other characteristic protected by law for any reason including recruitment, 
selection and promotion.

PNWU is also committed to compliance with the requirements of Title IX and, in 
accordance with those requirements, has adopted a policy of nondiscrimination on the 
basis of sex in its educational programs or activities including admission to those 
programs or employment in those programs. Refer to the section on Sexual and Other 
Misconduct for more information on Title IX.
DIVERSITY STATEMENT
Pacific Northwest University of Health Sciences recognizes that diversity enriches the educational experience.

PNWU students, faculty, staff, administrators and volunteers are valued for their diversity as reflected by our non-discrimination policy:

The University shall not discriminate against faculty, staff, volunteers, students, or applicants on the basis of race, ethnicity, color, sex, gender, religion, national origin, age, disabilities, sexual orientation, marital status, or any other characteristic protected by law for any reason including recruitment, selection and promotion.

PNWU is committed to facilitating an environment where persons can work together in an atmosphere free of all forms of abusive communication. PNWU acknowledges the individual right of expression within the bounds of courtesy, tolerance, and respect.

PNWU creates and supports a campus community that educates future healthcare professionals who value and appreciate the importance of diversity. PNWU strives to improve the quality of life of faculty, staff, and students by developing and implementing policies and programs that support the University's policy on diversity. PNWU hopes to help students learn about different cultures in society, understand diversity, and be able to work with others from varied backgrounds.

CONFLICT OF INTEREST AND DISCLOSURE
The University and its Board of Trustees have an affirmative duty to identify, disclose, and manage conflicts in conformance with this policy and the law.

The Board of Trustees, employees, and students shall disclose any conflict of interest. A conflict of interest includes remuneration, contractual relationships, employment, and family, financial, or other interests that could pose conflicts of interest.

University officials are prohibited from accepting from third parties (including staff, faculty or students) gifts, favors, services, or anything of value in a situation where decision-making or actions affecting the University may be influenced. University officials are prohibited from providing to third parties (including staff, faculty, or students) gifts, favors, services, or anything of value in a situation where decision-making or actions affecting the third-party recipient may be influenced. Notwithstanding the previous, gifts of nominal value, or gifts customarily given and generally viewed as appropriate in the business, may be accepted without violation of this provision. University officials shall exercise good judgment in making this determination, and should seek additional guidance in the event there is any question as to whether a particular gift violates this policy.
Gifts from Students and Others
With regard to all employees and faculty, PNWU strives to be above reproach in all matters. This includes perceptions of fairness and objectivity. Faculty members in particular must not use their position, authority, or relationship with students to obtain uncompensated labor for their own personal or economic gain. Faculty and staff may not ask students to perform services unrelated to legitimate academic activities unless the student is adequately compensated for such services. Faculty members must not solicit gifts or favors from students. Faculty and staff must not accept gifts or favors where they have reason to believe that such gift or favor is motivated by a desire to secure some academic advantage.

Therefore, PNWU employees, including faculty, must not accept personal gifts beyond the small token of appreciation from students. Neither should gifts beyond the token of appreciation be accepted from firms with which PNWU does business. In every circumstance, faculty members should avoid accepting even token gifts from students prior to submission of grades for those students, or completion of supervision.

Additional Conflicts of Interest – Related to Financial Aid and Accounting

1. The University bans revenue-sharing arrangements with any lender. This is defined as any arrangement between a school and a lender that results in the lender paying a fee or other benefit, including a share of the profits, to the school, its officer, employees or agents, as a result of the school recommending the lender to its students or families of those students.

2. The University bans employees of the financial aid office receiving gifts from any lender, guaranty agency or loan servicer. This excludes:
   a. Brochures or training material related to default aversion or financial literacy.
   b. Food, training or informational materials as part of training as long as that training contributes to the professional development of those individuals attending the training.
   c. Favorable terms and benefits to the student employed by the institution as long as those same terms are provided to all students at the institution.
   d. Entrance and exit counseling as long as the institution’s staff are in control and they do not promote the services of a specific lender.
   e. Philanthropic contributions from a lender, guaranty agency, or servicer unrelated to education loans.
f. State education, grants, scholarships, or financial aid funds administered by or on behalf of the State.

3. The University bans contracting arrangements whereby any employee of the school’s financial aid office may not accept any fee, payment or financial benefit as compensation for any type of consulting arrangement or contract to provide services to or on behalf of a lender relating to education loans.

4. The University prohibits steering borrowers to particular lenders, or delaying loan certifications. This includes assigning any first-time borrower’s loan to a particular lender as part of their award packaging or other methods.

5. The University prohibits offers of funds for private loans. Schools may not request or accept such offers. This includes any offer of funds for loans to students at the institution, including funds for an opportunity pool loan, in exchange for providing concessions or promises to the lender for a specific number of loans, or inclusion on a preferred lender list.

6. The University bans staffing assistance from a lender. Schools may not request or accept any assistance with call center staffing or financial aid office staffing. This excludes:
   a. Professional development training for financial aid administrators.
   b. Providing educational counseling materials, financial literacy materials, or debt management materials to borrowers, provided that such materials disclose to borrowers the identification of any lender that assisted in preparing or providing such materials.
   c. Staffing services on a short-term, nonrecurring basis to assist the school with financial aid-related functions during emergencies, including State-declared or federally declared natural disasters, and other localized disasters and emergencies identified by the Secretary.

7. The University bans advisory board compensation. Employees of the institution may not receive anything of value from a lender, guarantor, or group in exchange for serving in this capacity. They may, however, accept reimbursement for reasonable expenses incurred while serving in this capacity.

Additional Conflicts of Interest - Related to Pharmaceuticals or similarly related Industry

1. Gifts: gifts or gratuities offered by industry to specific individuals are prohibited.

2. Meals: meals may be accepted when brought on site for groups to enjoy which do not create an advantage for industry.
3. Training/Consulting, Travel and CME: Industry support for travel stipends, educational scholarships and visiting professorships may only be provided in the form of unrestricted educational grants with monies going directly into an educational account and not directly to specific individuals. Any training activities must be clearly differentiated from sales activities. All content must be controlled by the University.

4. Samples, Supplies, and Medical Equipment: A written letter of agreement must accompany any such items clarifying the intention of such donation and that no quid pro quo is expected.

5. Research: The Dean with advice from the Dean's Council has oversight over COI and should be consulted when considering accepting industry support of any kind.

RESOURCES – FINDING INFORMATION
This catalog serves as the primary resource for information, services, policies, and procedures; however, there are several other places to obtain pertinent information and updates.

- PNWU.edu: The website is a resource for all student needs, latest news, University calendar, forms, links to other important information, etc.
- Self-Service: PowerCAMPUS, Self Service, is the portal for class schedule, University account balance and statements, student ID, financial aid, grades, and transcripts.
- PNWU Moodle Site: Is a learning management system used for coursework information, assignments, syllabi, etc.
- E*Value: Clinical rotation schedules, credentialing documents, and evaluations.

DISCLAIMER
The Student Catalog represents information and requirements which may be altered from time to time by the University at its sole discretion. The provisions of the Student Catalog do not constitute a contract. The University reserves the right to change any provision or requirement at any time. The University complies with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act Amendments of 1989. All inquiries regarding the Student Catalog should be directed to Enrollment Services at info@pnwu.edu or 509.249.7888.

The Catalog is the responsibility of Enrollment Services. Any recommendations for additions, deletions, or changes in the Catalog must be submitted in writing to the appropriate dean. Final approval must be granted by the president of the University.

Most of the forms, policies and procedures referred to throughout this catalog are available on the University website, PNWU.edu.
CONTACT INFORMATION
Administrative offices are open weekdays from 8:00 a.m. to 5:00 p.m. Visitors are strongly encouraged to make appointments before visiting the campus to ensure that the person they need to see is available. The PNWU address is:

GENERAL POLICIES

ACADEMIC FREEDOM
It is the policy of the University to foster and maintain full freedom of discussion, inquiry, teaching and research, and standards of professional conduct and public morals. The faculty, the staff, the administration, and the students of the University are entitled to discuss relevant subjects freely in the classroom. In scholarship and publication, each faculty, staff, administrator, and student is entitled to investigate, pursue inquiry, and discuss freely those subjects which they are competent to address; and to develop, maintain, and present opinion and reasoned conclusions relevant to the work.

ACCOMMODATIONS
Students may find that they have disabilities that diminish academic performance. PNWU can make reasonable accommodations for students with documented disabilities who are otherwise qualified for admission and can meet the minimal technical standards as stated in this catalog. Students with disabilities are encouraged to contact Student Affairs as early as possible. Requests for accommodations must be made in writing to Student Affairs.

CHILDREN IN LEARNING ENVIRONMENT
It is not appropriate for children to be in the classroom. It causes disruption to other students. There may be circumstances that are appropriate for children to come on the campus but it is asked that you are sensitive to those in class and those studying. If you need an accommodation, please request one in writing to Student Affairs.

COUNSELING SERVICES
The purpose of the Student Assistance Program (SAP) is to provide the student, spouse or domestic partner, and dependent members of the student’s family with an opportunity to confidentially discuss problems and concerns that may be affecting their lives. Within this confidential program, students are given appropriate resources designed to help with specific problems.

Licensed psychologists are available for short term care. If longer term care is needed, Northwest Associates has been contracted to provide those services. This care is available for all students both on campus and at clinical rotations.

PSYCHIATRIC OR MEDICAL ASSESSMENT
The PNWU student acknowledges that, from the time of his/her acceptance to the University and until withdrawal or graduation from the University, he/she may be subject to psychiatric, psychological, or medical assessment and/or evaluation and/or treatment to ensure fitness for duty as the University sees fit. Any student need for psychiatric, psychological, or medical assessment and/or treatment whether voluntary or due to a recommendation or requirement by the Wellness Committee, the Student
Progress Committee, or any other PNWU official will be at the sole expense of the student.

HEALTH INSURANCE AND HEALTH CARE PROVIDERS
PNWU students must present proof of personal health insurance to Enrollment Services at matriculation and again by August 1 of each year they are enrolled. They must maintain personal health insurance throughout their educational program. The student is solely responsible for his/her medical bills. The University assumes no responsibility to seek reductions or waivers.

The University does not endorse any specific insurance plan or health care provider; however, for convenience, a list of providers has been made available as a resource at PNWU.edu. It is the desire of PNWU to assist and support students in receiving needed physical health care by establishing agreements with healthcare service providers within the Yakima community. Affiliation agreements have been secured with Yakima Regional Medical and Cardiac Center and Yakima Valley Memorial Hospital and their associated facilities.

Students are prohibited from using a PNWU faculty, staff, preceptor, or other affiliated University personnel as their healthcare provider in order to avoid conflict of interest.

WELLNESS COMMITTEE
The Wellness Committee is a small group of staff and administration who meets as needed to address sensitive student mental and/or physical wellness issues. This committee is extremely conscious about confidentiality. If a student wishes to bring something to the attention of the Wellness Committee, he/she can do so by contacting Student Affairs. The Wellness Committee has the authority to make a recommendation to the dean concerning whether a student should continue in the program.

CRIMINAL BACKGROUND CHECK (CBC)
Prior to matriculation and starting clinical rotations with a contracted/affiliated hospital or healthcare facility, students are required to undergo a CBC to enhance patient safety and protection. This is a requirement placed on the healthcare facilities by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). In compliance with this requirement:
1. PNWU requires that all students prior to admission undergo a CBC. The student will assume the cost of the CBC prior to admission. No student will be allowed to participate in any classroom activities without proof of a CBC given to Enrollment Services.
2. PNWU requires that all students will undergo a CBC prior to the commencement of the third-year clinical rotations. The student will assume the cost of the CBC prior to the third-year matriculation.
3. An entity which is approved and licensed to perform background checks will be selected at the sole discretion of PNWU.

4. The CBC search may include, but not be limited to, sources such as the following:
   - Social security number trace
   - Washington State Patrol criminal background check
   - Criminal histories background check
   - Nationwide wants & warrants
   - HHS/OIG list of excluded individuals, GSA list of parties excluded from Federal Programs Consumer report information related to character, general reputation and credit that may be subject to the Fair Credit Reporting Act
   - Sex offender background check
   - Anti-Terrorism and USA Patriot Act
   - Sanctions

The background check vendor will provide a summary report of their findings to the student and to PNWU.

Criminal Background Check Process:
1. PNWU will notify all newly accepted students of the requirement that they must have an approved CBC prior to matriculation. A student who is challenging any part of the CBC may enroll if he/she acknowledges that the challenge must be cleared prior to attending classes.
2. PNWU will notify all second year students of the requirement that they must have an approved CBC prior to commencement of the clinical rotation. Students will be referred to the CBC website to complete the process.
3. A fully detailed copy of the report will be delivered directly to the student with a copy to Enrollment Services.
4. Any questionable or adverse information provided through the CBC will be referred to the Admissions Committee for accepted applicants and the Student Progress Committee for second year students for further evaluation. An adverse or questionable report may result in the denial of admission or dismissal from PNWU.

Challenged Results of the Criminal Background Check
1. Students who question the accuracy of the report should immediately contact the entity that performed the CBC regarding the area they believe to be incorrect.
2. Re-verification and issuance of a new report will follow the process and procedure laid out by the company conducting the CBC.
3. If the student does not challenge the questionable or adverse information from the entity that conducted the CBC and when the CBC findings are such that the student does not meet the admission requirement or the healthcare site's CBC requirement, the student will be referred to the Admissions Committee for accepted applicants or the Student Progress Committee for second-year students for further evaluation.
4. Any adverse decision by the Admissions Committee and the Student Progress Committee may have a final appeal through the dean of the appropriate college.
Notification from PNWU that a prospective student is denied enrollment or a currently enrolled student is denied participation in clinical rotations due to CBC findings will be provided by certified letter to the student from Student Affairs. PNWU-COM will review CBC findings with felony/misdemeanor charges for severity, frequency/pattern, time period, rehabilitation, unprofessional behavior, accountability, and outcome. The applicant/student should investigate possible consequences on future licensure.

**DRUG SCREEN**

PNWU reserves the right to require drug screens of accepted students and current students at any time it so chooses. This is a requirement placed on healthcare facilities by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). In compliance with this requirement, PNWU requires that all students agree to undergo a drug screen whenever it is requested of them. The student will be charged for the cost of the drug screen. A private company that is approved and licensed to perform drug screens will be selected at the sole discretion of PNWU.

1. A copy of the drug screen will be delivered directly to the student upon request with a copy to Enrollment Services.

2. Any questionable or adverse findings revealed through the drug screen will be referred to the Wellness Committee for current students and the Admission Committee for accepted students, for further evaluation. An adverse or questionable drug screen may result in a rescinded offer of admission for an accepted student and dismissal from PNWU for a current student.

3. Non-compliance or a diluted test may result in a rescinded offer of admission for an accepted student and dismissal from PNWU for a current student.
   a. A current student will not be allowed to participate in any classroom activities and will be referred to the Student Progress Committee to determine his/her ability to continue at PNWU.

**Challenged Results of the Drug Screen**

1. Students who question the accuracy or results of the drug screen should immediately contact the private company that conducted the drug screen regarding the area they believe to be incorrect. Students can request the company’s contact information from Student Affairs. All disputes pertaining to the drug screen findings must follow the policies and procedures of the private company that conducted the drug screen.

2. If the student does not challenge the questionable or adverse information from the private company that conducted the drug screen and when the drug screen findings are such that the student does not meet PNWU standards, the student will be referred by Student Affairs to the Wellness Committee for further evaluation and recommendations.

3. Failure to comply with the Wellness Committees recommendations will result in the student being referred to the Student Progress Committee for further evaluation and potential disciplinary action including but not limited to dismissal.
4. Any adverse decision by the Student Progress Committee may have a final appeal through the dean of the appropriate college.

DRUG AND ALCOHOL USE
PNWU is committed to being a drug-free, healthy, and safe place of learning. The unlawful possession, use, or distribution of illicit drugs and alcohol by students on PNWU property or as part of any of its activities is prohibited. Students are required to come to study in a mental and physical condition that will allow them to perform satisfactorily as a student. PNWU does not condone any form of drug, substance, or alcohol abuse by its students. No alcoholic beverages or illegal drugs may be manufactured in any academic facility, clinic, or hospital associated with PNWU. Students may not use, possess, distribute, sell, or report to duty after having consumed controlled substances or alcohol while on PNWU premises or while conducting any education-related activity away from PNWU premises. Students may use legally prescribed drugs only if they do not impair their ability to perform the essential functions effectively and safely without endangering themselves or others. PNWU has and enforces a zero tolerance policy on the illegal consumption of alcohol by students. Any violation of this policy will result in disciplinary and appropriate legal action against the offending individual(s). Any student who attends class or a rotation or is on the premises of a facility affiliated with PNWU while under the influence of alcohol or illicit drugs is subject to immediate suspension and possible dismissal at the discretion of the Student Progress Committee, the Wellness Committee, and/or the dean.

Any student who has been convicted of an offense under any federal or state law involving the possession or sale of illegal drugs or the abuse/misuse of alcohol during his/her enrollment at PNWU is subject to immediate suspension and possible dismissal at the discretion of the Student Progress Committee, the Wellness Committee, and/or the dean.

PNWU does not permit alcohol at student-sponsored events on campus. For off-campus PNWU-sponsored student events, alcoholic beverages will be allowed only when approved by the president for a specific period of time. The sponsorship of student activities by promoters of alcoholic beverages is not permitted. When alcohol is permitted at an off-campus student event, the University will be responsible for and shall control the dispensing of alcoholic beverages. The sale of alcoholic beverages is prohibited under all circumstances unless an outside licensed catering company, with the appropriate insurance and permits, is selling the beverages. Persons who rent a room at the University for outside business or personal use may be allowed to dispense and consume alcoholic beverages with the appropriate license, insurance, and permits, allowing them to do so. All event requests must go through the student event request form. Alcoholic beverages may not be advertised or promoted on campus. At any such off-campus event where alcohol is served, students are expected to limit their consumption so that it does not cause the student to become disruptive, belligerent, argumentative, sloppy/unkempt in appearance, or lead to slurring of speech,
inappropriate personal interactions and/or behavior, or an inability to operate a motor vehicle safely or result in a violation of any federal or state law.

There are health risks associated with the use of illicit drugs and the abuse of alcohol. Alcohol and drug abuse can cause physical and emotional dependence. Users may develop a craving for these substances and their bodies may respond to the presence of drugs in ways that lead to increased use. Certain drugs, such as opiates, barbiturates, alcohol, and nicotine create physical dependence. When a regular user stops taking the drug, the body experiences the physiological trauma known as withdrawal. Psychological dependence occurs when taking drugs becomes the center of the user’s life. Some drugs have an effect on the mind and body for weeks or even months after drug use has stopped. Drugs and alcohol can interfere with memory, sensation, and perception. They can distort experiences and cause loss of self-control that can lead users to harm others as well as themselves.

There are local, state and federal sanctions for the unlawful possession or distribution of illicit drugs and alcohol. State law considers the illegal use of drugs and alcohol serious crimes. The sanctions for first-time violations of these laws range from fines to terms of incarceration, or both. Additionally, local ordinances and municipal codes impose a variety of penalties for the illegal use of drugs and alcohol. See Washington RCW Chapter 69.50, the Uniform Controlled Substances Act, for additional information. There may also be civil consequences that result from the violation of state drug and alcohol statutes. For example, property associated with the criminal acts, including homes and vehicles, can be confiscated by the government and persons convicted of felonies may be barred from government employment, and lose the right to vote. Federal law considers the manufacture, distribution, dispensation, possession, or use of illegal drugs, or any controlled substance, a serious crime. For the most up-to-date Federal Trafficking Penalties information, visit the website of the US Drug Enforcement Administration, at http://www.dea.gov/agency/penalties.htm. In addition to possible criminal sanctions, students can lose financial aid eligibility.

PNWU makes available drug or alcohol counseling, treatment, or rehabilitation or re-entry programs. Students may seek these services through the Student Assistance Program. For more information please see the Counseling Services section of the Student Catalog. Students may also contact the Washington Physicians Health Program to participate in their confidential services: www.wphp.org.

This policy will be reviewed biennially to determine its effectiveness, implement changes, and ensure that disciplinary sanctions are consistently enforced.

TOBACCO
Smoking and tobacco use is not allowed on PNWU property.
EMPLOYMENT
A health professions curriculum content and time required for completion is such that any outside employment by the student is strongly discouraged.

FOOD SERVICE/DINING FACILITIES
Pacific Northwest University of Health Sciences does not offer a meal plan or cafeteria for students.

GAMBLING
Gambling is not permitted on PNWU property.

DRESS CODE
Students will, during regular business hours (Monday - Friday, 8:00 a.m. - 5:00 p.m.), be dressed appropriately with awareness to personal hygiene, cleanliness, professional demeanor, and professional dress. Modest professional apparel, or scrubs (top and bottom), will be required for all activities in PNWU buildings. In the case of special events, students must adhere to professional dress.

HOUSING
Students must secure their own housing during the duration of their medical education. PNWU may have suggestions to assist students in their search for appropriate, affordable housing. For housing in the Yakima Valley, students may find resources at PNWU.edu.

Students are prohibited from staying with faculty, staff, preceptors, or other affiliated University personnel. A rare exception may be made by the appropriate dean for the college with the understanding that the students must sign a contract outlining the expectations of both parties (this would include duration, facility usage, etc.).

NOTIFICATION OF EMERGENCY CONTACT
In the event of an emergency involving a PNWU student, PNWU may contact the person the student has designated as his/her emergency contact. If the student is considered by a representative of PNWU in his/her judgment to be in a physical or mental crisis, the representative may contact the student’s designated emergency contact. By providing the name and phone number of an emergency contact, the student is granting PNWU the authority to notify the emergency contact of the student’s condition.

OFFICIAL MAILING ADDRESS
It is imperative that Student Affairs have current records with regards to name, mailing address, telephone number, and emergency contact information. PowerCAMPUS Self-Service must be updated immediately with any change in information.
PROFESSIONALISM

Professionalism is the basis of medicine’s contract with society. It demands placing the interests of patients above those of the physician, setting and maintaining standards of competence and integrity, and providing expert advice to society on matters of health. The principles and responsibilities of medical professionalism must be clearly understood by both the profession and society. A set of professional responsibilities includes, but is not limited to a commitment to:

- Clinical competence
- Honesty with patients
- Patient confidentiality
- Maintaining appropriate relations with patients
- Improving quality of and access to care
- A just distribution of finite resources
- Scientific knowledge
- Maintaining trust by managing conflicts of interest

As members of a profession, physicians should be respectful of one another and participate in the processes of self-regulation, including remediation and discipline of members who have failed to meet professional standards. The profession should also define and organize the educational and standard-setting process for current and future members. Physicians have both individual and collective obligations to participate in these processes. These obligations include engaging in internal assessment and accepting external scrutiny of all aspects of professional performance.

Examples of student conduct which violate professional standards and may lead to disciplinary action by the University include but are not limited to:

- Intentionally interfering with classes, research, administration, patient care, movement of other people, or any school function
- Showing a lack of respect towards other students, patients, faculty, staff, administration, or other school personnel
- Failure to complete assignments, attend required classes, shadowing or rotations
- Failure to resolve conflicts in a reasonable manner or disrespecting diversity
- Being mentally or constitutionally unable to follow the directions provided by faculty, staff, administration, or other school personnel
- Academic dishonesty, including cheating, plagiarism, attempting to pass examinations by improper means, or assisting another student in such an act or simply tolerating it in others
- Intentionally providing false information to the school or officers of the school, altering records, or refusing to comply with the directions of school officials
- Intentional damage or theft of any school property or property of any school employee or visitor
- Practicing or appearing to practice medicine without a license (such as engaging in clinical activity without the direct supervision of a licensed physician) or accepting any form of reimbursement, payment, or gift for performance of clinical duties
- Sexual or physical harassment of any other student, employee, or visitor to the school
- The use, distribution, sale, or possession of illicit drugs or non-prescribed substances, and
- Any intentional action in violation of local, state, or federal law or being indicted by a local, state, or federal court system for a felony

RECORD RETENTION
The record retention procedures for the University include but are not limited to:
- Non-academic records of disciplinary actions will be maintained by the University as the responsibility of Student Affairs. These actions are maintained as part of the student’s permanent record.
- In cases where disciplinary action leads to a student’s dismissal/ineligibility or re-enrollment, the record becomes a part of the permanent academic file and transcript.
- Financial aid records will be maintained by the University for three years after the end of the award year in which the student last attended.

The full Document Retention and Destruction policy is available at PNWU.edu.

REQUESTING A LETTER OF RECOMMENDATION
For a student to obtain a letter of recommendation from a PNWU employee, a letter of recommendation request form must be completed and provided to the letter writer a minimum of 14 days prior to the date the letter is to be submitted. The letter of recommendation request form may be found at PNWU.edu.

RESEARCH
PNWU encourages basic science, clinical, and curriculum research. Every effort will be undertaken to encourage and assist students and faculty in the development and funding for research programs which are of interest to PNWU faculty and students.

SEXUAL AND OTHER MISCONDUCT (INCLUDING HARASSMENT, STALKING, BULLYING, AND INTIMIDATION)
PNWU strives to provide a safe environment for students to learn, and employees to work, free from the detrimental effects of sexual and other harassment, bullying, intimidation, and any form of unlawful discrimination as prohibited by Federal and State laws. Any violation of PNWU policy or applicable law by a faculty member, fellow student, employee or persons doing business with or for PNWU, male or female, will result in corrective or disciplinary action which could include dismissal from PNWU,
termination from employment, or termination of any contractual relationship. Some violations could result in a report to law enforcement.

This policy applies to all PNWU programs and activities.

**Definitions** – sexual or related misconduct can be in many different forms as defined below.

**Sexual Harassment**
Unwelcome, sex or gender-based verbal or physical conduct that is sufficiently severe, persistent or pervasive such that it unreasonably interferes with, limits or deprives someone of education or employment access, benefits or opportunities, and/or the ability to participate in or benefit from the University’s educational program and/or activities, and is based on power differentials (quid pro quo), the creation of a hostile environment, or retaliation.

Examples may include, but are not limited to:
- Unwanted sexual advances
- Offering benefits/advantages in exchange for sexual favors
- Making threatening reprisals after a negative response to sexual advances
- Visual conduct, such as leering, making sexual gestures, or displaying sexually suggestive objects, pictures, cartoons, or posters
- Verbal conduct, such as making derogatory comments, epithets, slurs, sexually explicit jokes, or sexual comments about a student’s body or dress
- Sexual conduct that has the purpose or effect of unreasonably interfering with an individual’s academic performance or creating an intimidating, hostile, demeaning, or offensive academic or living environment
- Verbal sexual advances or propositions
- Verbal abuse of a sexual nature, graphic verbal commentary about an individual’s body, sexually degrading words to describe an individual, or suggestive or obscene letters, notes, or invitations
- Physical conduct, such as touching, assault, or impeding or blocking movement

**Hostile Environment**
Any situation in which there is harassing conduct based on sex or gender that is severe and pervasive or persistent and objectively offensive such that it alters or interferes with the conditions of education or employment or denies or limits a person’s ability to participate in or benefit from the University’s programs, services, opportunities, or activities from both a subjective (the alleged victim’s) and an objective (reasonable person’s) viewpoint

Although a hostile environment occurs when conduct is objectively and subjectively severe, pervasive or persistent, persons exposed to or who witness harassing conduct based on sex or gender should not wait to report it until it becomes severe or pervasive.
or persistent. PNWU can take action to prevent the continuation of such conduct, intervene so that the conduct does not escalate, and introduce measures to protect persons targeted by such harassment.

**Quid Pro Quo Sexual Harassment**
Exists when there are unwelcome sexual advances, requests for sexual favors or other verbal or physical conduct of a sexual nature; and submission to or rejection of such conduct results in adverse educational or employment action

**Retaliatory Harassment**
Retaliatory harassment is any adverse employment or educational action taken against a person because of the person's participation in a complaint or investigation of discrimination or sexual misconduct. Also includes retaliation against the complainant by the respondent or by the respondent's friends or others who are sympathetic to him/her. Can also include retaliation directed toward a third party because of his/her participation in a complaint process or for supporting a party

**Non-Consensual Sexual Contact**
Non-consensual sexual contact is any intentional sexual touching however slight with any object by one person upon another person that is without consent and/or by force. Sexual Contact includes intentional contact with the breasts, buttock, groin, or genitals, or touching another with any of these body parts, or making another touch you or themselves with or on any of these body parts; or any other intentional bodily contact of a sexual manner.

**Non-Consensual Sexual Intercourse**
Non-consensual sexual intercourse is any sexual intercourse however slight with any object by one person upon another person that is without consent and/or by force. Non-Consensual Sexual Intercourse includes vaginal penetration by a penis, object, tongue or finger, anal penetration by a penis, object, tongue, or finger, and oral copulation (mouth to genital contact or genital to mouth contact), no matter how slight the penetration or contact.

**Sexual Exploitation**
Occurs when a person takes non-consensual or abusive sexual advantage of another for his/her own advantage or benefit, or to benefit or advantage anyone other than the one being exploited (and that behavior does not otherwise constitute one of other sexual misconduct offenses.)

Examples of sexual exploitation include, but are not limited to...
- Invasion of sexual privacy
- Prostituting another person
- Non-consensual recording or broadcast of sexual activity
• Going beyond the boundaries of consent (such as letting someone hide in the closet to observe consensual sex)
• Engaging in voyeurism
• Knowingly exposing another to an STD or HIV
• Exposing one’s genitals in non-consensual circumstances; inducing another to expose their genitals
• Sexually-based stalking, bullying and cyber-bullying may also be forms of sexual exploitation

Stalking
A course of conduct directed at a specific person that is unwelcome and would cause a reasonable person to feel fear.

Bullying & Cyber-bullying
Bullying and cyber-bullying are repeated and/or severe aggressive behaviors that intimidate or intentionally harm or control another person physically or emotionally (and are not protected by freedom of expression). It often includes comments about race, color, national origin, sex, sexual orientation or disability. It often involves an imbalance of power, aggression, and a negative repeated behavior. It falls within Title IX when gender-based.

Relationship Violence
Relationship violence is violence between those in an intimate relationship to each other. Other terms include interpersonal violence, dating violence, domestic violence, and intimate partner violence. It always involves another Code violation. If based on gender/sex, would fall within Title IX.

Other Misconduct Offenses That May Require Title IX Based Response
• Threatening or causing physical harm, extreme verbal abuse, or other conduct which threatens or endangers the health or safety of any person based on that persons sex
• Discrimination, defined as actions that deprive other members of the community of educational or employment access, benefits or opportunities on the basis of gender
• Intimidation, defined as implied threats or acts that cause an unreasonable fear of harm in another
• Any rule violated on the basis of the victim’s sex/gender, which is severe enough to cause a discriminatory effect

Consent
Consent to engage in sexual activities is informed (knowing) and voluntary (freely given) which is active (not passive) with clear words or actions, and indicates permission to engage in mutually agreed upon sexual activity.
No means no, but nothing also means no; silence and passivity do not equal permission. To be valid, consent must be given prior to or contemporaneously with the sexual activity; past consent does not imply future consent. Consent can be withdrawn at any time, as long as that withdrawal is clearly communicated by the person withdrawing it. There is no consent if a person is mentally or physically incapacitated or impaired so that such person cannot understand the fact, nature or extent of the sexual situation, such as may occur as a result of impairment or incapacitation due to alcohol or drug consumption, sleep or unconsciousness. Similarly, there is no consent when there is force, expressed or implied, or use of duress or deception upon the victim.

Off-Campus Conduct
Conduct that occurs off campus can be the subject of a complaint or report and will be evaluated to determine whether it violates this policy, e.g. if off-campus harassment has continuing effects that create a hostile environment on campus.

Reporting Violations and Filing a Complaint
Any student who believes he/she has experienced sexual misconduct, sexual harassment, nonsexual harassment, intimidation, or bullying by anyone, including a faculty member, fellow student, employee, or by persons doing business with or for PNWU should report such conduct to the Title IX Coordinator or his/her designee. If the individual is comfortable doing so, he/she should also tell the offender that such conduct is unwelcome and unacceptable.

Faculty and employees who believe they have experienced sexual misconduct, sexual harassment, nonsexual harassment, intimidation, or bullying by any individual in connection with their work at PNWU should promptly report such conduct to the Title IX Coordinator or his/her designee. If the individual is comfortable doing so, he/she should also tell the offender that such conduct is unwelcome and unacceptable.

Individuals who have witnessed policy violations are encouraged to make a prompt report.

All individuals considering reporting policy violations but wishing to discuss the process or related issues can seek advice from certain confidential resources who are not required to share private personally identifiable information – such as mental health service providers or off campus crisis clinics who are by law permitted to maintain confidentiality. Most campus resources have certain legal obligations including a duty to report, so they are not in a position to advise individuals on a confidential basis or maintain confidentiality. However, most resources can discuss the process.
For additional information or to file a complaint, contact:
Title IX Coordinator
Stefanie Durand
Director of Human Resources
111 University Parkway, Ste. 202 | Yakima, WA 98901
HR@pnwu.edu | (509) 249-7714

Note that the Title IX Coordinator has broad responsibilities to the University and is not a confidential resource; individuals cannot make a report to the Title IX Coordinator in confidence.

STATEMENT OF THE COMPLAINANT STUDENTS’ RIGHTS

- The right to investigation and appropriate resolution of all credible complaints of sexual misconduct made in good faith to university administrators
- The right to be treated with respect by university officials
- The right of both accuser and accused to have the same opportunity to have others present (in support or advisory roles) during a campus disciplinary hearing
- The right not to be discouraged by university officials from reporting an assault to both on-campus and off-campus authorities
- The right to be informed of the outcome and sanction of any disciplinary hearing involving sexual assault, usually within 24 hours of the end of the conduct hearing
- The right to be informed by university officials of options to notify proper law enforcement authorities, including on-campus and local police, and the option to be assisted by campus authorities in notifying such authorities, if the student so chooses, this also includes the right not to report, if this is the victim’s desire
- The right to be notified of available counseling, mental health or student services for victims of sexual assault, both on campus and in the community
- The right to notification of and options for, and available assistance in, changing academic and living situations after an alleged sexual assault incident, if so requested by the victim and if such changes are reasonably available (no formal complaint, or investigation, campus or criminal, need occur before this option is available)
- The right not to have irrelevant prior sexual history admitted as evidence in a campus hearing
- The right not to have any complaint of sexual assault mediated (as opposed to adjudicated)
- The right to make a victim-impact statement at the campus conduct proceeding and to have that statement considered by the committee in determining its sanction
- The right to a campus no contact order against another student who has engaged in or threatens to engage in stalking, threatening, harassing or other
improper behavior that presents a danger to the welfare of the complaining student or others

- The right to have complaints of sexual misconduct responded to quickly and with sensitivity
- The right to appeal the sanction of the conduct body, in accordance with the standards for appeal established by the institution
- The right to review all documentary evidence available regarding the complaint, subject to the privacy limitations imposed by state and federal law, at least 48 hours prior to the hearing
- The right to be informed of the names of all witnesses who will be called to give testimony, within 48 hours of the hearing, except in cases where a witness’ identity will not be revealed to the accused student for compelling safety reasons (this does not include the name of the alleged victim/complainant, which will always be revealed)
- The right to preservation of privacy, to the extent possible and allowed by law. The right to a hearing closed to the public
- The right to petition that any member of the conduct body be removed on the basis of demonstrated bias
- The right to bring a victim advocate or advisor to all phases of the investigation and campus conduct proceeding
- The right to give testimony in a campus hearing by means other than being in the same room with the accused student
- The right to ask the investigators to identify and question relevant witnesses, including expert witnesses
- The right to be fully informed of campus conduct rules and procedures as well as the nature and extent of all alleged violations contained within the complaint
- The right to have the university compel the presence of student, faculty and staff witnesses, and the opportunity (if desired) to ask questions, directly or indirectly, of witnesses (including the accused student), and the right to challenge documentary evidence
- The right to be present for all testimony given and evidence presented before the conduct body
- The right to a conduct panel comprised of representatives of both genders.
- The right to have university policies and procedures followed without material deviation
- The right to be informed in advance of any public release of information regarding the complaint
- The right not to have released to the public any personally identifiable information about the complainant, without his or her consent

STATEMENT OF THE ACCUSED STUDENTS’ RIGHTS

- The right to investigate and appropriate resolution of all credible complaints of sexual misconduct made in good faith to university administrators against the accused student
- The right to be treated with respect by university officials
- The right to be informed of and have access to campus resources for medical, counseling, and advisory services
- The right to be fully informed of the nature, rules and procedures of the campus conduct process and to timely written notice of all alleged violations within the complaint, including the nature of the violation and possible sanctions
- The right to a hearing on the complaint, including timely notice of the hearing date, and adequate time for preparation
- The right not to have irrelevant prior sexual history admitted as evidence in a campus hearing
- The right to make an impact statement at the campus conduct proceeding and to have that statement considered by the board in determining its sanction
- The right to appeal the [finding and] sanction of the conduct body, in accordance with the standards for appeal established by the institution
- The right to review all documentary evidence available regarding the complaint, subject to the privacy limitations imposed by state and federal law, at least 48 hours prior to the hearing
- The right to be informed of the names of all witnesses who will be called to give testimony, within 48 hours of the hearing, except in cases where a witness’ identity will not be revealed to the accused student for compelling safety reasons (this does not include the name of the alleged victim/complainant, which will always be revealed)
- The right to a hearing closed to the public
- The right to petition that any member of the conduct body be removed on the basis of bias
- The right to have the university compel the presence of student, faculty and staff witnesses, and the opportunity to ask questions, directly or indirectly, of witnesses, and the right to challenge documentary evidence
- The right to have university policies and procedures followed without material deviation
- The right to have an advisor or advocate to accompany and assist in the campus hearing process, this advisor can be anyone except for legal representation, [optional: including an attorney (provided at the accused student’s own cost and is available for counsel outside of the hearing)], but the advisor may not take part directly in the hearing itself, though they may communicate with the accused student as necessary
- The right to a fundamentally fair hearing, as defined in these procedures
- The right to a campus conduct outcome based solely on evidence presented during the conduct process, such evidence shall be credible, relevant, based in fact, and without prejudice
- The right to written notice of the outcome and sanction of the hearing
- The right to a conduct panel comprised of representatives of both genders
- The right to be informed in advance, when possible, of any public release of information regarding the complaint
Interim Action
PNWU will take interim action to prevent the ongoing effects of harassment or sexual misconduct during the course of any investigation or adjudicatory process.

Retaliation
Retaliation against individuals filing complaints or participating in an inquiry is prohibited.

Mandatory Employee Reporting of Sex-based Discrimination, Sexual Harassment and Sexual Misconduct Involving Students
In order to enable the University to respond effectively and to stop instances of sex-based discrimination, sexual harassment and sexual misconduct involving students at the University proactively, all University employees (except those who are exempt by statute) must promptly report information they have about alleged or possible sex-based discrimination, sexual harassment, and sexual misconduct involving students to the Title IX Coordinator.

Investigation and Adjudication Process
The purpose of the investigation and adjudication process is to provide a prompt, safe, thorough and equitable procedure for all parties involved.

1. A report or complaint will be investigated by the Title IX coordinator, by itself or in conjunction with another appropriate office or their designee. They will interview the Complainant, Witnesses, Respondent or others as needed, and review any pertinent documents or other evidence. The investigation will be kept as confidential as is feasible in light of the duty of the University to review and address misconduct. Ordinarily, this process could take up to three weeks; however actions will be taken promptly to ensure a safe environment for all parties involved after a complaint is made until such time a decision is made.
   a. Complainant and Respondent are given a period of time to prepare any written statements or other appropriate documentation to be included in the report of investigation.
   b. If the investigation does not yield enough evidence to move forward, the parties will be notified that the complaint is dismissed.

2. Based on the investigation, interviews, evidence, and other relevant information, the Investigators will provide a report of investigation to the Chair of the Student Progress Committee which will include recommended findings, using a preponderance of the evidence standard, and recommended sanction(s).
   a. Copies will be provided to the Complainant and Respondent.
   b. The report of investigation should be completed in approximately one month from the date of complaint.
3. Student Progress Committee Chair appoints 3-4 faculty members of the Student Progress Committee and a representative from Student Affairs to a subcommittee to form a hearing committee.
   a. Complainant and Respondent may suggest an additional Student Progress Committee faculty member join the sub-committee.
   b. Members will not be those involved in the investigation.
4. Complainant and Respondent have reasonable time to review the report of investigation – at least 48 hours.
5. A hearing is scheduled for Complainant to address and respond to the Student Progress Committee Sub-Committee first. Second, a hearing is scheduled for the Respondent to address and respond to the Student Progress Committee Sub-Committee.
   a. Notes will be taken. The Chair of the Student Progress Committee may, at his/her option, arrange for a recorded or transcribed hearing in lieu of notes.
   b. Supporters, legal counsel or other members not on the Student Progress Committee Sub-Committee are not allowed to be in the hearing, however they may be consulted with outside of the hearing as needed, but not to impede or delay the process.
   c. The Dean may attend both hearings as an observer.
6. The Student Progress Committee Sub-Committee makes recommendation to the Dean and provides a copy to Complainant and Respondent.
7. The Dean makes a final decision in writing to the Respondent.
8. Student Affairs provides the Complainant written notice about the outcome and any sanctions that involve the Complainant.

Sanctions and Corrective Action
Violations of this policy will result in corrective action which will depend upon the facts and circumstances of each particular situation. Sanctions and Corrective Action could include steps such as counseling, reprimands, prohibition of further contact, suspension, or termination or dismissal.

Rights of Appeal
Either party may appeal the final decision through the appeal process described in this catalog. In the case of complaints by or involving students, Student Affairs personnel can provide assistance.

External Complaints
These procedures do not preclude external remedies for acts that may constitute violations of Title IX. Students, staff, faculty, parents and other legitimate users of PNWU's facilities or programs have the option at all times to file a criminal complaint with law enforcement or to seek a civil remedy, in addition to or in place of using these procedures, and may file a formal complaint with the United States Department of Education.
STUDENT/PATIENT/FACULTY/PRECEPTOR RELATIONSHIPS
The relationship between a student and faculty/preceptor or patients must always be kept on a professional basis. A student may not date or become intimately involved with faculty/preceptor or a patient. Conduct in such an unprofessional manner will be considered improper behavior and will be grounds for disciplinary action, including dismissal from PNWU.

STUDENT PUBLICATIONS/MEDIA RELATIONS/REQUESTS FOR DONATIONS
Student publications can be of valuable assistance in establishing and maintaining an atmosphere of free and responsible discussion and an intellectual environment on campus. They provide an opportunity for student interests to come to the attention of students, faculty, and administration and an opportunity to formulate student opinion on various issues. Students must adhere to the canons of responsible journalism, and are subject to the laws of libel, slander, and decency.

The printing or distribution of any publication, either electronic or in print, or the use of the University’s name or seal by students, faculty, or staff must follow the PNWU guidelines and have prior approval of the director of communications.

Students, faculty, and staff are required to direct inquiries from the media immediately to the president, dean, or director of communications before interviews are granted.

The administration wants to be supportive of student activities and encourages student involvement in the community. For University events and for events hosted/sponsored by a student organization or club that involve fundraising, all requests for donations and communications must first be initiated by completing the COM student event request form found at PNWU.edu. No solicitations may be sent out prior to approval.

LEAVE OF ABSENCE
A leave of absence (LOA) is a period of time approved by PNWU during which the student is not in attendance but is enrolled. Leave of absence is generally reserved for
medical conditions and emergency situations. Information is available in the Student Handbook for specific class level.

A student must explain in detail on the form the reason the LOA is being requested and must state the expected return date. Each student who is on an approved LOA is considered enrolled. There will be no tuition or other institutional charges during an LOA. The University will not disburse any additional or subsequent financial aid proceeds to a student on an approved LOA. Upon the student’s return from the leave, he/she continues to earn the financial aid previously awarded for the period of leave.

If a student does not return at the end of an approved LOA, the student is considered to have withdrawn on the day that the student began the initial LOA. The reclassification of the LOA to withdrawn requires the federal Return of Title IV funds calculation (see the Federal Aid Refund Calculations section), which may result in the student owing PNWU tuition, other charges, and/or living costs no longer covered by previously disbursed financial aid. The grace period for Title IV Loan borrowers may have started based on the revised withdrawal date. Any leave of absence that results in an extension of the program beyond the standard four academic years will incur tuition of half the tuition rate for the additional time.

If an LOA is not approved and the student no longer attends class, the student will be considered withdrawn from the University on the date the student last attended class. To reapply, a student must contact Enrollment Services.

The maximum time allowed for an LOA is 180 calendar days in any 12-month period, which will only be given for extenuating circumstances.

The dean will determine placement within the curriculum upon return. The returning student must also be in compliance with the minimum technical standards required by the appropriate program.

If an unforeseen circumstance, such as an auto accident, prevents a student from providing a written request prior to the LOA, the University may grant an LOA as long as the student qualifies and requests the LOA form as soon as is possible or as reasonable afterwards.

WITHDRAWAL FROM SCHOOL
All requests for withdrawal are initiated in Student Affairs. Students who discontinue their education at PNWU for any reason are required to complete an exit form provided by Student Affairs. The dean and the chief academic officer (or their designees) will meet to review the request to assure administrative procedures are followed and an academic plan considered. The dean will make the final decision to grant a request and will notify the student of the decision in writing. Failure to complete an exit form for any type of leave or withdrawal and obtain the proper signatures will result in a hold being
placed on all academic records. If a student chooses to withdraw from the University he/she automatically waives the right to an appeal of any disciplinary action or dismissal decision previously made by the Student Progress Committee and/or the dean. Guaranteed re-admission, based on withdrawal reason, may be voided upon failure to provide documentation in a timely manner.

- **Medical Withdrawal**—Granted to students who have a medically documented reason acceptable to the University. Students may apply for readmission. The Admissions Committee will review and make a recommendation to the dean who will make the final decision and if accepted the dean or his/her designee will determine class placement in the event of acceptance.

- **Advanced Study Withdrawal**—Granted to students who generally complete the first two years and wish to leave PNWU to pursue educational opportunities, such as PhD programs and/or research fellowships. Advanced study withdrawal will be granted by the dean for a maximum of one year with renewal. Readmission is guaranteed provided:
  1. The student has remained in compliance with PNWU’s codes of academic and behavioral conduct while on leave.
  2. The student makes satisfactory academic progress at the sponsoring institution.
  3. The student meets the minimum technical standards for admission.
  4. Submits to a criminal background check (CBC) and drug screen. Applicants for an advanced study withdrawal will be required to supply appropriate documentation as determined by the University. Students seeking advanced study withdrawal should initially meet with the appropriate dean to discuss the request.

- **Military Withdrawal**—Granted to students whose military reserve obligations may necessitate a period of absence from the academic program when they are called to extended active duty. Readmission is guaranteed pending proof of compliance with minimal technical standards and the codes of academic and behavioral conduct and submitting to a CBC and drug screen.

- **Personal Withdrawal**—Granted to students who wish to voluntarily leave PNWU for personal reasons. Students withdrawing from PNWU must apply for readmission.

Students completely withdrawing from the program within the first 25 percent of the enrollment period will receive a grade of withdrawal (W), for all registered courses. Withdrawals initiated during the next 50 percent of the enrollment period will receive a grade of withdrawal (W), withdrawal pass (WP), or withdrawal fail (WF) at the discretion of the course director. Withdrawals initiated during the final 25 percent of the course will receive the appropriate grade of withdrawal pass (WP) or withdrawal fail (WF).
REIMBURSEMENT OF FUNDS UPON WITHDRAWAL

Tuition Refunds
No part of the tuition charges will be refunded to a student who withdraws for any reason after the third week from the first day of the academic schedule for first year, second year, third year, or fourth year. A request for a tuition refund requires written notification to Student Affairs and must be received before the close of business during the week in which the refund is requested. The request for a tuition refund requires prior written notification of withdrawal from the University. The tuition refund shall be prorated as follows:

- 75 percent during the first week
- 50 percent during the second week
- 25 percent during the third week

All refunds will be returned through direct deposit into the student’s bank account via the automated clearing house (ACH).

All inquiries concerning the above policies should be directed to Student Affairs.

Federal Aid Refund Calculations
According to federal laws and regulations, PNWU will complete a refund calculation of federal aid for any student who withdraws.

The Higher Education Amendments of 1998 regulate how colleges and universities handle Title IV (Federal) funds when a recipient withdraws from school. This policy is separate from the University’s refund of institutional charges. Title IV funds include Pell Grants, Federal Supplemental Educational Opportunity Grants, PLUS Loans, Perkins Loans, and Stafford Loans. The policy states that up through the 60 percent point in each term a pro-rata schedule will be used to determine how much Title IV aid the student has earned. For example, if the student has attended 31 percent of the enrollment period, the student has earned 31 percent of his/her Title IV aid, and 69 percent of the aid must be returned to the federal government. After the 60 percent point of the term, the student has earned 100 percent of the aid for which the student was eligible. Additional information on the return of Title IV funds may be obtained from Enrollment Services.

The official date of the withdrawal is the date that Student Affairs receives the student’s written request or the last date of attendance whichever comes first. The percentage of time completed in the enrollment period is determined by dividing the number of days in the enrollment period into the number of days attended. If 60 percent of the term has been completed, there is no return of Title IV funds.

STUDENT WRITTEN GRIEVANCES
If at any time any student feels that he or she has been wrongly treated by a member of the University, the student may present a written grievance to the appropriate official.
student’s grievance concerning a faculty member should be made to the faculty member’s department chair or division chief. A grievance concerning a staff member should be made to the staff member’s immediate supervisor or to the chief academic officer. A grievance concerning another student should be made to Student Affairs or appropriate dean. After a written grievance is received, a response to the grievance will be issued within 10 business days. Any grievance, after response by the appropriate official, may be appealed to the president. For questions and delivery of any grievance, please send them to:

Pacific Northwest University of Health Sciences
Student Affairs
111 University Parkway, Ste. 202
Yakima, WA  98901
509.249.7724

PNWU will maintain records of the receipt, adjudication, and resolution of written grievances.

STUDENT COMPLAINTS OF ACCREDITATION STANDARDS
If, at any time, any student has a complaint related to accreditation standards and procedures, the student must present his/her complaint to the appropriate accrediting agency following that agency’s guidelines for submission of a complaint.

Should the accrediting agency find the student complaint related to accreditation valid, PNWU will abide by the procedures set forth by the accrediting agency to rectify the noncompliance to the accreditation standard(s). PNWU will maintain records of the receipt, adjudication, and resolution of such complaints.

At no time will any adverse action be allowed against the student(s) reporting the adverse accreditation standard. Any reportable adverse activity against the student(s) will result in disciplinary activity as delineated in the sexual and other unlawful harassment section of this catalog.

COMPLAINTS REGARDING PROGRAM INTEGRITY
The College of Osteopathic Medicine is authorized, has been granted a waiver, or has been determined to be exempt from authorization requirements in over 30 states for the purpose of conducting educational enterprise (primarily clinical rotations). Because this list of states changes based on state fees, interest of students, changing regulations, and other factors, please refer to PNWU.edu for the most recent list of states.

Complaints regarding program integrity must be submitted in writing to the associate dean for academic affairs. PNWU will maintain records of the receipt, adjudication, and resolution of written complaints. If resolution of the complaint is not achieved, a
A complaint regarding program integrity may be filed with the appropriate state agency. Please reference the information provided by the State Higher Education Executive Officers Association (SHEEO). The information found on their website is updated as changes occur with the various state offices.

CAMPUS SECURITY
The goal of campus security is to provide a safe and secure campus for the students, faculty, and staff of PNWU. The office staffs a director of security and uniformed security officers. PNWU is proactive in crime prevention techniques such as closed circuit television, electronic access door locking and monitoring systems, and the implementation of crime prevention through environmental design. PNWU Security started and supports an internet block watch program with its neighboring businesses.

The following are policy excerpts. For full text of safety and security policies, the Annual Campus Safety and Security Report, and the Emergency Preparedness Manual, please see the Campus Security page at PNWU.edu or Campus Security in Butler-Haney Hall.

CAMPUS LAW ENFORCEMENT AUTHORITY
Limited campus law enforcement authority is granted to Pacific Northwest University of Health Sciences Safety and Security Department. As such, PNWU security personnel act as agents for the University itself, and have the authority to ask persons for identification and to determine whether individuals have lawful business at PNWU campus sites. PNWU security personnel do not have arrest powers; all criminal incidents are referred to local law enforcement, that being the Yakima Sheriff’s Office, who have jurisdiction on and adjacent to the PNWU campus.

Students and employees are required to comply with directives of campus security, law enforcement agencies, and any other University officials; students are required to present valid ID when requested. PNWU security personnel enforce University policy, rules, and regulations as well as local, state, and federal laws, and report criminal violations to the proper authorities.

ANNUAL CAMPUS SAFETY AND SECURITY REPORT
PNWU is committed to assisting all members of the PNWU community in providing for their own safety and security. PNWU is compliant with the Jeanne Clery Act which requires the tracking and reporting of crime statistics for access by staff, faculty, students, and prospective students. The annual Campus Safety and Security Report is available at PNWU.edu. If you would like to receive a paper copy of the Campus Safety and Security Report that contains this information, you can contact Campus Security by calling 509.452.5100.
TIMELY WARNING
In accordance with the Jeanne Clery Act, PNWU will immediately inform the campus community about a significant emergency or dangerous situation involving an immediate threat to the health or safety of students or employees occurring on the campus. In addition, PNWU shall, provide timely warning in a manner likely to reach all members of the campus community of those crimes an institution is required to report and include in its Annual Campus Safety and Security Report. Such warnings shall be provided to students and employees in a manner that is timely and that will aid in the prevention of similar occurrences. Warnings may be communicated as an emergency banner at PNWU.edu, text message, email, voice message, in-house public paging system, fire alarm, and/or radio and television broadcast. Every incident is unique; therefore different communication media will be activated based on their reach, effectiveness, and location.

In the case of an emergency activate one of the emergency call boxes on-campus, call 911 and then notify PNWU Campus Security at 509-823-3346 if it is safe to do so. To remain anonymous, use Crime Stoppers, 1-800-CRIME-SC or text TIPSC & your message to CRIMES (274637).

DISCLOSURE OF CRIMES OF VIOLENCE AND NON-FORCIBLE SEX OFFENSES
Pacific Northwest University of Health Sciences will, upon written request, disclose to the alleged victim of a crime of violence, or a non-forcible sex offense, the results of any disciplinary hearing conducted by the college against the student who is the alleged perpetrator of the crime or offense. If the alleged victim is deceased as a result of the crime or offense, PNWU will provide the results of the disciplinary hearing to the victim’s next of kin, if so requested.

Following the hearing of an incident of alleged violence, the victim may submit a letter to the dean requesting the outcome of the hearing. The dean or the dean’s designee will verbally inform the victim of the outcome. Should the victim be deceased, this information may be released to the victim’s next of kin. The next of kin must be listed in the student’s PNWU records and proper identification by the next of kin will be required. The outcome of such hearing can also be released pursuant to a court order or subpoena.

INFORMATION REGARDING REGISTERED SEX OFFENDERS
Law enforcement agency information concerning registered sex offenders may be obtained by going in person to the Yakima County Sheriff’s Office, 1822 South First Street, Yakima, Washington. The Yakima County Sheriff sex offender information web page is in compliance with the 1990 Community Protection Act in order to provide adequate notice to the community concerning sex offenders who are, or will be residing in the community, and to assist community members in developing constructive plans to prepare themselves and their children for residing near released sex offenders.
Offender Watch may be accessed at http://sheriffalerts.com/cap_main.php?office=54495. The purpose for this link is to provide publishable information on offenders within the specified radius of the address entered. This service also provides a free email alert system when offenders move.

CAMPUS ACCESS
During normal business hours Pacific Northwest University of Health Sciences will be open to faculty, staff, students, parents, contractors, guests, and invitees. During non-business hours PNWU facilities are locked; access is restricted to authorized students and employees. PNWU issues proximity access cards that allow students and employees to enter authorized areas 24 hours a day. During an extended closure, only authorized personnel will be granted access to campus property and facilities.

Identification badges must be worn or carried at all times while on campus or on approved rotations. These are nontransferable and must be surrendered upon termination of student status. The badge allows access to the building at all hours. If lost, contact Campus Security and a fee will be assessed for a replacement.

INLEMENT WEATHER
In the event of extreme weather conditions, notice of school closure will be made over local radio and television stations. If inclement weather prevents you from attending school on a day that PNWU is open, you are responsible for making up any work or exams missed.

PARKING
All parking on campus is by permit only. Permits may be obtained by completing the appropriate forms in Campus Security or at PNWU.edu. Students may park in designated areas only. Violators will be contacted by Campus Security. If the issue cannot be resolved, the student will be referred to Student Affairs as refusing to comply with direction of school rules and officials. PNWU is not responsible for damages to any vehicle parked on campus.

WEAPONS, FIREARMS AND ALARM SYSTEMS
Possession of any firearm, including, but not limited to, fireworks, air pistols, or air rifles is strictly prohibited on PNWU property. Weapons of any kind are strictly prohibited on PNWU property. Tampering with any fire alarm or equipment is prohibited.

ANIMALS ON CAMPUS
In consideration of personal safety, as well as sanitation, no person may bring an animal on to the University campus, except for:

- Service animals for the disabled. A service animal for the purposes of this policy is any guide dog, signal dog, or other animal individually trained to provide assistance to an individual with a disability.
- Conditions related to ADA where reasonable accommodations can be made;
- Animals approved for academic research.
- Animals that are brought on campus for a purpose specifically approved and under conditions approved by the president or designee.

All service animals must be on a leash and not a threat to anyone on campus. Documentation must be brought to Human Resources supporting the request to have an animal on campus.

TECHNOLOGY SERVICES
The Office of Technology Services is made up of the Instructional Technology Department, which focuses on the technology directly related to the educational process, and the Information Technology Services Department, which supports the University computing infrastructure and end user computing devices.

LAPTOPS
Students are required to have a laptop that meets the minimum hardware, and software, requirements detailed on the Technology Services webpage on PNWU.edu. Laptop purchases are the responsibility of each student. Financial aid is available to cover the purchase cost of a laptop once during the term of the student’s program. Technology Services will provide limited software support and consulting for student owned computing devices, details of the support provided can be found on the Technology Services webpage.

ELECTRONIC COMMUNICATIONS
To facilitate communication throughout the University, e-mail accounts for all students, faculty, and staff are provided. The primary use of PNWU electronic communication is to support the educational mission of the University and to conduct daily business. Certain practices related to e-mail are prohibited. These e-mail accounts should not be considered private. They are the property of the University and as such can be reviewed by appropriate personnel as required. E-mail messages are expected to be professional and, courteous. E-mail is a public medium; avoid its use for confidential communication.

Prohibited use includes, but is not limited to:
- The use of electronic communications to send documents in violation of copyright laws or any communication that breaches the behavioral standards, academic conduct, or harassment sections of this document.
- The use of electronic communication systems to send information, messages, or files that are restricted by law or regulation.
- The use of electronic communications to intimidate others or to interfere with the ability of others to conduct PNWU business, including academic pursuits.
- The construction of electronic communication so it appears to be from another person.
• The attempt to obtain access to files or communication of others for idle curiosity.
• The use of electronic communications that may be offensive, racist, sexist, pornographic, politically charged, or in poor taste.

PNWU is committed to creating and maintaining an environment where persons can work together in an atmosphere free of all forms of abusive or demeaning communication. PNWU acknowledges the individual right of expression within the bounds of courtesy, sensitivity, and respect. Disciplinary action will be taken against individuals found to have engaged in prohibited use of the PNWU electronic communications resources.

All Students must acknowledge and comply with the University’s Computer and Network Usage Agreement. For additional information about the use and policies pertaining to e-mail and other network usage contact the Technology Services Department at 509.249.7777.

USE OF UNIVERSITY EQUIPMENT, SUPPLIES and ASSETS
All business conducted on University property, using University equipment, supplies, or assets must be for approved University purposes. This includes such things as printing, copying, and/or distributing materials.

LECTURE CAPTURE
PNWU faculty are required to use the University’s lecture capture system to record all lectures. This system allows PNWU to record and distribute lectures and other audio and video recordings to students in a secure environment through the University’s Learning Management System (LMS). Because PNWU may be recording in the classroom, student questions and/or comments may be recorded.

Students may watch recordings online, or download them for off-line viewing on their computers, smartphones, or media players. These recordings are copyrighted by the University. Posting them to another website, including YouTube, Facebook, or any other site without express, written permission may result in disciplinary action and possible civil prosecution.

PEER-TO-PEER FILE SHARING
Institutional policies and sanctions related to the unauthorized distribution of copyrighted material: The University takes copyright infringement seriously. As set forth in the Computer and Network Usage Agreement, all students, staff, and faculty must abide by federal and state copyright laws when using University computing or network resources.

The unauthorized publishing or use of copyrighted material on the University computer network is strictly prohibited and users are personally liable for the consequences of
such unauthorized use. This specifically applies to Peer-to-Peer or P2P file-sharing of copyrighted music and movies. Students should be aware that by engaging in unauthorized sharing of copyrighted material, they not only violate University policy, but they may also be held criminally and civilly liable by federal and/or state authorities.

Under current copyright law, criminal cases of copyright violation carry a penalty of up to five years in prison and a $250,000 fine. Civil penalties for copyright infringement include a \textit{minimum} fine of $750 for each work.

Pacific Northwest University will subject students, staff, and faculty who violate this policy to discipline as appropriate. For a first-time violation of this copyright policy, students, staff, and faculty are required to remove the copyrighted item(s) and cease sharing immediately. Repeated infringement is subject to disciplinary action by Student Affairs, or by Human Resources, up to and including expulsion or termination from the University.

**FINANCIAL AID**

Enrollment Services is the primary agent to provide counseling and assistance to students with the necessary forms to obtain loans, scholarships, grants, and other forms of financial aid.

It is the student’s primary responsibility to secure educational financing. This means that such things as supplying personal documentation, supplying family documentation, and ensuring that a student qualifies for loans by having a favorable credit report are the student’s obligations. All documents requested by Enrollment Services must be received before financial aid will be processed. All disbursements will be made via direct deposit.

Health professions education is expensive. The average osteopathic physician incurs about $220,495 of debt by the time he/she graduates from a private school of osteopathic medicine. During schooling, most students are required to live at a modest level. The primary obligation for financing education lies with the student and the student’s parents/spouse. The federal and private agencies that make funds available for borrowing do so with the understanding that a student must sacrifice in order to achieve their degree.

Students accepted by PNWU and requiring financial aid must file the Free Application for Federal Student Aid (FAFSA) to assess aid eligibility. The needs analysis system set by the federal government ensures equity of treatment among all applicants. The University uses this needs analysis system to determine the amount of need-based financial assistance, loan amounts, and scholarship awards for which a student is eligible.
Financial aid as awarded or borrowed under the federal or private programs cannot exceed the PNWU estimated cost of attendance. Funding is available for a student’s direct and indirect educational costs while he or she receives an education, but the student must be frugal and a good money manager. Students must carefully monitor their budgets.

**Loans**

As a rule, most people believe it is easier to borrow money for educational expenses. As a health care student, certain special loan programs may be available, the primary sources being the Stafford Loan Programs and the Graduate PLUS loan program. A student may not be eligible for the full amount based on his/her federal needs analysis, the PNWU estimated cost of attendance, or prior student loan indebtedness. The amount a student can borrow is based on the cost of his/her education and potential personal contributions, not on the student’s desire for capital.

The Federal Direct Unsubsidized Stafford Loan and Federal Direct Graduate PLUS Loan accrue interest from disbursement date. Borrowers must consider the repayment implications and avoid excessive borrowing. PNWU has a federally mandated obligation to keep a student’s indebtedness to a minimum. A student may request counseling through Enrollment Services while in school about the nature of his or her debt and the projected payment schedule. Group sessions will be provided at least once each academic year.

Borrowing money from these programs is a privilege, not a right; regulations controlling these programs change periodically. A loan is not a gift or grant; it must be repaid. Student loans are only to be used for related educational expenses and personal living expenses.

Default is the failure of a borrower to make an installment payment when due or to meet other terms of the promissory note. If this happens, it is reasonable to conclude that the borrower no longer intends to honor the obligation to repay. Defaulted loans are reported to national credit agencies, thus affecting credit ratings and future ability to borrow money. Over-borrowing can cause defaulting on a student loan. This is why educational debt management is essential. PNWU encourages students to learn some basic budgeting techniques, how to cut costs, and how to live with less. If a student’s loan goes into default, the University, the organization that holds the loan, the state, and the federal government may all take action to recover the money. The federal government and the loan agencies may deny a school’s participation in the student loan programs or charge a school or its students a higher origination fee if the school’s default rate is too high. The University will withhold the transcript of any individual if that individual is in arrears or in default under any loan or loan program, when such arrears or default adversely affects the University in any way.
Scholarships and Grants
Enrollment Services will provide students with information on scholarship notices that are sent to the office. It is the student’s responsibility to notify Enrollment Services of any scholarship or grant awards received.

Standards for Satisfactory Academic Progress
Federal law requires that all students receiving financial assistance from Title IV and Title VII funds maintain satisfactory academic progress. PNWU policy follows the qualitative (grade-based) academic standards that apply to all students and in addition, a required quantitative (time-related) standard.

While on warning or probation, the student may receive financial aid for one enrollment period. At the end of that period, the student must be in good standing, or financial aid eligibility will be denied.

Enrollment Services will notify students who are ineligible for continued assistance and will provide them with information regarding their academic status.

Appeals of the academic status are submitted to the Student Progress Committee.

Drug Conviction
A student is ineligible to receive title IV, HEA program funds, if the student has been convicted of an offense under any federal or state law involving the possession or sale of illegal drugs for conduct that occurred during a period of enrollment for which the student was receiving title IV, HEA program funds. However, the student may regain eligibility if the student successfully completes a drug rehabilitation program after the student’s most recent drug conviction. The student regains eligibility on the date the student successfully completes the program. The student should work closely with Enrollment Services to determine eligibility.

LIBRARY
The PNWU Library provides comprehensive resources and services to support student education and research. Available resources include health sciences databases, print and electronic books and journals, and audiovisual materials. Library staff members provide reference service, in-depth research assistance, group and individual instruction in online searching of PubMed and other databases, and interlibrary loan. Interlibrary loan and document delivery are free to PNWU students, faculty, and staff.

The library is located next to the Grand Foyer in Butler-Haney Hall and is available seven days a week during staffed hours. Wireless connectivity is available for laptop computers and other Wi-Fi devices. The library also provides public computer workstations for accessing the library’s catalog and other resources.
For more information on library resources, services, and policies, please see library on PNWU.edu, or contact the library staff.

Phone: 509.249.7745
Email: library@pnwu.edu

COPYRIGHT POLICY
It is the policy of Pacific Northwest University of Health Sciences that all students comply with US Copyright Law as it relates to the use of copyright-protected works in the classroom and library at PNWU.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws
Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement. Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages affixed at not less than $750 and not more than $30,000 per work infringed. For “willful” infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense. For more information, please see the website of the US Copyright Office at www.copyright.gov.

All students are required to read and abide by the PNWU Copyright Policy. The policy can be found in the library folder at:

Students who violate the PNWU Copyright Policy or the PNWU Peer-to-Peer File Sharing Policy (see policy listed under Technology Services section of this catalog) will be subject to disciplinary action, up to and including expulsion from the University.
COLLEGE OF OSTEOPATHIC MEDICINE (COM)

OSTEOPATHIC MEDICINE
The United States’ fully licensed osteopathic physicians (DO) practice the entire scope of modern medicine, bringing a patient-centered, holistic, hands-on approach to diagnosing and treating illness and injury. Osteopathic physicians may choose any specialty, prescribe drugs, perform surgeries, and practice medicine anywhere in the United States. DOs bring the additional benefits of osteopathic manipulative techniques to diagnose and treat patients. DOs work in partnership with patients to help them achieve a high level of wellness by focusing on health education, injury and disease prevention.

PNWU-COM is very proud of its graduates’ success in residency placement, board score pass rates and commitment to primary care. Below are tables highlighting their accomplishments.

HISTORY
Osteopathic medicine is a distinctive form of medical care founded on the philosophy that all body systems are interrelated and dependent upon one another for good health. This philosophy was developed in 1874 by Dr. Andrew Taylor Still, who pioneered the concept of “wellness” and recognized the importance of treating illness within the context of the whole body.

Andrew Taylor Still was born in Virginia in 1828, the son of a Methodist minister and physician. At an early age, Still decided to follow in his father’s footsteps as a physician. After studying medicine and serving an apprenticeship under his father, Still became a licensed M.D. in the state of Missouri. Later, in the early 1860s, he completed additional coursework at the College of Physicians and Surgeons in Kansas City, Missouri. He went on to serve as a surgeon in the Union Army during the Civil War.

After the Civil War and following the death of 3 of his children from meningitis in 1864, Still concluded that the orthodox medical practices of his day were frequently ineffective and sometimes harmful. He devoted the next ten years of his life to studying the human body and finding better ways to treat disease.

His research and clinical observations led him to believe that the musculoskeletal system played a vital role in health and disease and that the body contained all of the elements needed to maintain health, if properly stimulated. Still believed that by correcting problems in the body’s structure through the use of manual techniques now known as osteopathic manipulative treatment, the body’s ability to function and to heal itself could be greatly improved. He also promoted the idea of preventive medicine and endorsed the philosophy that physicians should focus on treating the whole patient, rather than just the disease.

These beliefs formed the basis of a new medical approach - osteopathic medicine. Based on this philosophy, Dr. Still opened the first school of osteopathic medicine in Kirksville, Missouri in 1892.

PHILOSOPHY
Osteopathic medicine is a separate and distinct branch of medical practice that is based on a set of philosophical principles and stresses a comprehensive approach to the maintenance of health. Osteopathic medical education is unique in its emphasis on the neuromusculoskeletal system and its utility in the diagnosis and treatment of disease. It is the unobstructed, interrelationship of all the body’s systems by which health is maintained and by which disease is prevented. Osteopathic medicine makes use of the following principles that assist the osteopathic physician to look for health, and not simply treat a disease state:

a. The human body is a dynamic unit of function.
b. The human organism is self-regulating and self-healing.
c. Structure (anatomy) and function (physiology) are reciprocally interrelated.
d. The function of the musculoskeletal system goes beyond support and may be vital in the diagnosis and treatment of disease.

THE OSTEOPATHIC PHYSICIAN’S OATH
I do hereby affirm my loyalty to the profession I am about to enter. I will be mindful always of my great responsibility to preserve the health and the life of my patients, to retain their confidence and respect both as a physician and a friend who will guard their secrets with scrupulous honor and fidelity, to perform faithfully my professional duties, to employ only those recognized methods of treatment consistent with good judgment and with my skill and ability, keeping in mind always nature’s laws and the body’s inherent capacity for recovery.

I will be ever vigilant in aiding the general welfare of the community, sustaining its laws and institutions, not engaging in those practices which will in any way bring shame or discredit upon myself or my profession. I will give no drugs for deadly purposes to any person, though it be asked of me. I will endeavor to work in accord with my colleagues in a spirit of progressive cooperation, and never by word or by act cast imputations upon them or their rightful practices.

I will look with respect and esteem upon all those who have taught me my art. To my college I will be loyal and strive always for its best interests and for the interests of the students who will come after me. I will be ever alert to further the application of basic biologic truths to the healing arts and to develop the principles of osteopathy which were first enunciated by Andrew Taylor Still.

PNWU-COM MISSION, PROGRAM GOALS, AND OBJECTIVES

MISSION
Pacific Northwest University of Health Sciences College of Osteopathic Medicine educates and trains students to become health care professionals with osteopathic values, and conducts research to provide quality care to communities of the Pacific Northwest, particularly rural and medically underserved populations.

PROGRAM GOALS AND OBJECTIVES
A. Teaching Goal: Provide a learner-centered curriculum that prepares students for graduate medical education and osteopathic clinical service primarily in rural and medically underserved areas of the Northwest. In order to achieve this goal, PNWU-COM has set the following program objectives:
   1. Provide medical practice learning and training experiences in rural, medically underserved, and Northwest locations.
   2. Educate students to be culturally competent, caring physicians using a learner-centered curriculum model based on the National Board of
Osteopathic Medical Examiners Fundamental Osteopathic Medical Competency Domains.

3. Continually appraise and improve the educational program through analysis of student learning outcomes and curriculum assessment.

4. Recruit outstanding faculty and provide opportunities for faculty to develop in their areas of expertise.

B. Research Goal: Contribute to the advancement of knowledge through research and scholarly activities. In order to achieve this goal, PNWU-COM has set the following program objectives:

1. Recruit inquiry-minded faculty and students.

2. Encourage participation in scholarly activity and a vibrant research agenda that addresses the health care issues impacting the communities we serve (especially in the fields of basic biomedical sciences, clinical medicine and osteopathic principles and practice).

3. Provide financial resources to support scholarly activity and research capacity development.

4. Translate research about health care into clinical practice to increase access, improve quality, and reduce costs (especially within osteopathic clinical practice).

C. Service Goal: Collaborate with communities for the betterment of the health, education, and well-being of those communities. In order to achieve this goal, PNWU-COM has set the following program objectives:

1. Support and participate in community service and public health initiatives and programs, particularly those that provide opportunity for osteopathic clinical services.

2. Allocate time and expertise of faculty, staff, and administration to ensure an efficient and effective level of service.

3. Participate in local, state, regional, national, and international professional organizations.

D. Graduate Medical Education (GME) Training Goal: Facilitate development of GME opportunities in rural and medically underserved communities, particularly in the Northwest. In order to achieve this goal, PNWU-COM has set the following program objectives:

1. Develop GME training (residencies, subspecialty residencies, and fellowships) to provide a seat for every PNWU graduate.

2. Emphasize residencies in generalist medicine so that the proportion of generalist residencies selected by graduates exceeds the national average.
3. Promote rural residencies so that the proportion of residencies selected by graduates exceeds the proportion rural residencies available.

E. Student Achievement Goal: Academically prepare students for graduate medical education (GME). In order to achieve this goal, PNWU-COM has set the following program objectives:
   1. The PNWU mean score for first-time takers on each COMLEX exam is at or above the national mean.
   2. The PNWU first-time pass rate on every level of the COMLEX USA exam is at or above the national pass rate.
   3. Students are deemed clinically competent by credentialed clinical faculty.

ACADEMIC RESOURCES
Academic Affairs is responsible for providing academic support to the faculty and students of the COM. Academic Affairs, through the Learning Skills Specialist, is responsible for responding to the academic needs and development of students. Academic Affairs will also advise and assist students with the formation of an annual Individualized Learning Plan (ILP) and development of a student portfolio based on evidenced achievement of the PNWU-COM educational objectives, and on students’ reflection on their own progress.

ACADEMIC SKILL DEVELOPMENT
Academic skill development is available for any student who would like help improving study strategies or test-taking skills. Assistance is available in several areas including: identification of learning preferences, becoming active learners, note-taking, memorization techniques, using resource materials, studying for tests, reducing test anxiety, effectively using a tutor, and studying in small groups. The Learning Skills Specialist will oversee delivery of many of these services, which may be provided by the Learning Skills Specialist, faculty, or students. Throughout the year, a variety of seminars/workshops may be offered to students. Students may be offered sessions on study strategies, test-taking, preparing for boards, becoming an effective tutor, etc.

TUTORING AND RECITATION
PNWU provides tutorial services for students who have been identified as requiring additional educational assistance. Although students often form study groups and partners on their own Academic Affairs coordinates a formal tutoring and recitation program. With the assistance and recommendations from the faculty, peer tutors and recitation leaders are identified and made available to students who need help. The tutoring program provides the student with the opportunity to be assigned a near-peer or peer tutor at no cost. Students may contact the Learning Skills Specialist to apply for tutoring services.
ACADEMIC ADVISEMENT
Each student is assigned a faculty advisor through Academic Affairs. The faculty advisor will be a faculty member whose responsibility is to monitor the progress of student advisees, to help the student to locate academic resources, and to be available for any personal or academic support that is needed by the student. The student is responsible for contacting their faculty advisor on an agreed upon timeline. Students are also encouraged to identify a clinical faculty mentor to provide input for residency planning.

STUDENT PORTFOLIOS
Portfolio development is facilitated by Academic Affairs and is embedded within the existing curriculum. The development of the student portfolio represents a framework of achievement of learning outcomes relative to the PNWU-COM educational objectives and outcomes and is designed to showcase student learning and provide the context for student reflection upon growth as an emerging physician. The submission of an effectively developed competency-based portfolio is a PNWU-COM graduation requirement.

ADMISSIONS
Enrollment Services acts as the primary agent for the acceptance of applicants and has an admissions program that responds to student and University needs.

REQUIREMENTS FOR ADMISSION
The requirements for admission to PNWU are found on the following pages. With regard to admission the University follows the non-discrimination policy set forth in the Notice of Nondiscrimination section of the catalog, and the requirements of federal and state law including Title IX. It does not discriminate against applicants based on socio-economic background.

APPLICATION
The minimum age to matriculate at PNWU-COM is 18 years of age and the applicant must be a US Citizen or permanent resident. Application to PNWU-COM is made by submitting a primary application through the American Association of Colleges of Osteopathic Medicine Application System (AACOMAS): www.aacom.org. Applicants must designate PNWU-COM on the primary application in order for PNWU to receive the application.

An invitation to complete a supplemental application may be sent to the applicant after the primary application has been reviewed.

The PNWU Admissions Committee will review files only after all of the following materials have been received.
1. A completed AACOMAS application, including official MCAT scores, and a completed PNWU supplemental application;
2. A nonrefundable supplemental application fee made payable to PNWU; and
3. A letter of recommendation from each of the following sources, which must be written within two years prior to making application:
   a. A physician (preferably a D.O. who is a member of the AOA);
   b. A science faculty member who is familiar with the applicant’s undergraduate academic work; and
   c. A pre-medical source (a pre-medical advisor or committee).

Non-traditional students who have taken time off between undergraduate and post graduate studies may use professors in their graduate program to meet the science faculty recommendation requirement. Similarly, individuals serving in the military may use a supervisor, such as, a commanding officer to meet the pre-medical source requirement.

The PNWU-COM Admissions Committee will consider applications from all qualified individuals; however, in order to meet the mission of the College of Osteopathic Medicine, preference is given to applicants from Alaska, Idaho, Montana, Oregon, Washington, and rural and/or medically underserved areas of the country.

ACADEMIC REQUIREMENTS FOR ADMISSION
The College policies are nondiscriminatory. Applicants to the College are considered on their intellectual ability, scholastic achievement, commitment, and suitability to succeed in the study of osteopathic medicine.

The minimum academic requirements for admission to the first-year class are:
1. A baccalaureate, masters, or doctoral degree from a regionally accredited college or university.
2. The Medical College Admissions Test (MCAT). Students must take the exam and have the official scores sent to ACCOMAS. MCAT test scores are valid for 3 years from the original test date.
3. Satisfactory completion of the following college courses, including laboratory work:
   - English Composition and Literature 6 Semester Hours
   - General Chemistry 8 Semester Hours
   - Organic Chemistry 8 Semester Hours
   - Physics 8 Semester Hours
   - Biological Sciences 12 Semester Hours
   (4 hours of which can be Biochemistry)

These basic requirements must be passed and taken for credit at an accredited college or university.

The ability to use a personal or network computer is an important skill that will assist students with PNWU course work. Therefore, it is strongly recommended that each
entering student have a good working knowledge of common PC use and applications. PNWU utilizes the latest in Microsoft Office® and Windows® applications.

**MINIMAL TECHNICAL STANDARDS FOR ADMISSION**

It is the policy of PNWU that no student shall be excluded from participating in, be denied the benefits of, or be subjected to discrimination in any program or activity sponsored by the University because of marital status, age, sex, gender, sexual orientation, race, ethnicity, color, creed, religion, disabilities, national origin, or other characteristic protected by law.

With or without a reasonable accommodation, applicants and students must meet certain minimal technical standards which identify reasonable expectations of osteopathic medical students and physicians in performing common functions. PNWU does not discriminate against, and will provide reasonable accommodations to disabled applicants or students who are otherwise qualified. Requests for accommodations must be made in writing to Student Affairs as early as possible.

A candidate for the DO degree must have multiple abilities and skills, including observation, communication, motor, conceptual, integrative and quantitative, behavioral and social. A candidate must be able to perform in a reasonably independent manner. PNWU will attempt to develop creative ways of opening medical school admissions and education to qualified individuals with disabilities.

The minimum technical standards for admission are outlined in the accompanying chart. Candidates with disabilities must meet the standards with, or without, a reasonable accommodation. The following considerations are applicable to candidates with impairments that interfere with their ability to meet the standards.

**Observation**

The candidate must be able to acquire a level of required information as represented through demonstrations and experiences in the basic sciences. This includes but is not limited to information conveyed through physiologic and pharmacological demonstrations in animals, as well as microbiologic cultures and microscopic images of microorganisms and tissues in normal and pathologic states. A candidate must be able to observe a patient accurately, at a distance and close at hand; acquire information from written documents; and see information presented in images on paper, film, slide, or video. A candidate must be able to interpret x-ray and other graphic images and digital or analog representations of physiologic phenomenon (such as ECGs). Observing and acquiring information from these sources usually requires functional visual, auditory, and somatic sensation, enhanced by other sensory modalities.
When a candidate’s ability to observe or acquire information through these sensory modalities is compromised, the candidate must demonstrate proficiency using reasonable alternative means/abilities to acquire and use the essential information.

**Communication**
The candidate must be able to communicate effectively, efficiently, and sensitively with patients and their families and with all members of the health care team.

**Motor**
Candidates and students should have sufficient motor functions, with or without reasonable accommodation, to execute movements that are required to provide general care and emergency treatment to patients. Candidates should be able to perform palpation, percussion, auscultation and other diagnostic maneuvers; basic laboratory tests; and diagnostic procedures. Examples include: cardiopulmonary resuscitation, administering intravenous medication, applying pressure to stop bleeding, opening of obstructed airways, suturing of simple wounds, and performing simple obstetrical maneuvers. Such actions require coordination of both gross and fine muscular movements; equilibrium; and functional use of the senses of touch and vision, with or without assistive aids.

**Sensory**
Osteopathic treatment requires exceptional sensory skills or techniques. Individuals who are otherwise qualified but who have significant tactile sensory or proprioceptive disabilities (such as, for example, individuals with significant pervious burns, sensory motor deficits, cicatrix formation, and many malformations of the upper extremities) will be required to demonstrate the ability to achieve necessary medical results, with or without assistive aids.

**Strength and Mobility**
Osteopathic treatment often requires upright posture with sufficient lower extremity and body strength and some degree of mobility is required for emergency codes and CPR. Individuals with significant limitations in these areas will be required to demonstrate the ability to achieve necessary medical results, with or without assistive aids.

**Intellectual, Conceptual, Integrative, and Quantitative Abilities**
The candidate must be able to measure, calculate, reason, analyze, and synthesize in a timely fashion. In addition, the candidate should be able to comprehend three-dimensional (3D) relationships and understand the spatial relationships of structure.

**Behavioral and Social Attributes**
Candidates must possess sufficient emotional health required to fully use their intellectual abilities, to responsibly attend to the diagnosis and care of a patient, and to develop mature, sensitive, and effective relationships with patients.
Candidates and students must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of patients.

Compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all personal qualities that will be assessed during the admissions and educational processes.

|                  | 1. Locate and identify dissected nerves                                 |
|                  | 2. Evaluate posture, locomotion and movement in a clinical setting      |
|                  | 3. Identify landmarks on tympanic membranes                             |
|                  | 4. Identify materials correctly to be used in laboratories              |
|                  | 5. Locate, identify and describe foreign bodies, blood vessels, sutures and skin lesions |
|                  | 6. Observe audiovisual materials on projection or overhead screens during lectures |
|                  | 7. Read printed materials on handouts and tests                         |
|                  | 8. Locate sections on a slide                                           |
|                  | 9. Identify micro-photographic images projected on a screen             |
|                  | 10. View a class room visual aid, including motion pictures, at 20 feet |
|                  | 11. Observe and evaluate the human gait at 20 feet                      |
|                  | 12. Discriminate body height and depth differences of 2mm and identify anatomic landmarks for symmetry and postural differences visually |
|                  | 13. Differentiate small bacterial colonies from artifacts on agar plates |
|                  | 14. Appreciate fine structures in pathology and other images presented in class and in the textbook. |
| Sufficient uncorrected or corrected visual acuity and color perception to resolve objects microscopically | 1. Recognize stained bacteria microscopically  
2. Observe, manipulate and accurately identify microbiologic cultures  
3. Identify normal and pathologic cells and tissues |
|---|---|
| Communication | Possess fluent formal and colloquial oral English skills | 1. Demonstrate command of the course material to a professor or attending physician  
2. Understand oral lectures, ask questions and understand answers  
3. Explain procedures and discuss results with professors and fellow students  
4. Explain medical conditions to patients, attending physicians and fellow students  
5. Explain procedures and discuss test results on prescribed treatments with patients, attending physicians and fellow students  
6. Direct and coordinate activities of nurses, students, assistants, specialists, therapists and other members of the health care team as approved and directed by the attending physician  
7. Understand laboratory safety and emergency situation instructions |
| Capable of legible handwriting in English | 1. Complete a written medical history  
2. Participate in small group discussions with laboratory partners  
3. Prepare classroom reports  
4. Prepare accurate and legible documentation of patient history, physical exam, assessment and treatment plan  
5. Recognize, understand and respond appropriately to spoken or nonverbal communication of distress or discomfort  
6. Understand typed and handwritten lecture and laboratory handouts and electronic communications |
| Motor | Possess equilibrium and coordination of gross and fine muscular movements | 1. Possess sufficient strength and mobility to provide general care and emergency treatment to patients including CPR, administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, the suturing of simple wounds and the performance of simple obstetrical maneuvers  
2. Coordinate fine movement of fingertips, palms, and wrists as in elevation of the cranium  
3. Manipulate writing instruments and write legibly, completing SOAP* notes, documenting in patient charts and writing prescriptions  
* Subjective, Objective, Assessment, Plan  
4. Stand with limited opportunity for gross movement for a minimum of 2 hours at a time, as necessary for particular medical procedures, such as performance of obstetrical delivery, assistance of surgical delivery, and assistance of surgical procedure  
5. Use a computer keyboard and mouse |
|---|---|---|
| Possess sufficient visual-motor coordination permitting delicate manipulations of specimens, instruments, and equipment | 1. Participate in laboratory exercises using microscopes, microbiological cultures and dissection instruments  
2. Dissect arteries, vessels and nerves of the brachial plexus  
3. Manipulate laboratory materials including reagents and pipettes  
4. Suture simple wounds  
5. Obtain culture specimens including cerebrospinal fluid as part of a lumbar puncture procedure  
6. Perform joint injections |
| Sensory | Possess accurate sense of touch and temperature discrimination | 1. Palpate the musculoskeletal system  
2. Perform history and physical examination procedures specific to an individual |
| 3. Perform a bimanual pelvic exam and palpate for ovarian disease  
4. Participate in laboratory exercises accurately using and adjusting microscopes, glass slides, inoculating loops, pipettes, microbiological cultures and reagents  
5. Palpate distances in depth, elevation and width of body structures within 2 mm of difference  
6. Perform intravenous insertion and venipuncture on both basic and difficult models and patients  
7. Palpate texture differences, hydration states, fine muscle tension differences, changes in moisture and temperature  |
|---|
| Functional use of hearing 1. The ability to use a stethoscope, recognizing the sound of patient conditions accurately such as a Grade 5 systolic murmur  
2. Understand laboratory experience and classroom demonstration with minimal instruction  
3. Understand a speaker in a darkened room  |
| Functional use of vision 1. Recognize structures and patient conditions accurately  
2. Interpret laboratory and classroom demonstrations accurately with minimal instruction  |
| Strength and Mobility Upright posture, endurance, strength, flexibility, stability and mobility adequate to safely guide, enhance and resist movement of another person, and to perform physical exams  |
| Maintain equilibrium and control movement of self and of a patient in and changing between sitting, standing, prone, lateral recumbent and supine positions while performing neuromuscular diagnosis and osteopathic manipulative treatment  |
| Sufficient equilibrium, upright posture, mobility and endurance to attend and participate in lectures, examinations and laboratory exercises and patient contact 1. Tolerate the sitting position long enough to hear a lecture, typically 50 minutes  
2. Tolerate the sitting position long enough to take a written examination, 45 minutes to 3 hours  |
| Intellectual, Conceptual, Integrative and Quantitative | Apply knowledge, skills and values learned from course work and life experiences to new situations | 1. Perform a history and physical, then develop an appropriate differential diagnosis, assessment and treatment plan  
2. Assess and evaluate cases presented in class and on examinations  
3. Interpret x-ray and diagnostic imaging studies |
| --- | --- | --- |
|  | Visualize and recall three dimensional relationships | 1. Perform osteopathic or medical evaluation of patient posture and movement including analysis of physiological, biomechanical, behavioral, and environmental factors in a timely manner, consistent with acceptable clinical norms  
2. Comprehend oral and written presentations of material and communicate that understanding upon examination in a timely manner, occasionally demonstrating a grasp of the information within the same class period as presented |  |
<p>|  | To receive, decode, interpret, recall, reproduce and apply information in the cognitive, psychomotor, and affective domains of learning to perceive relationships, solve problems, evaluate work, gauge progress and demonstrate understanding of course material |  |  |
|  | Process multifunctional data and sensory input requiring cognitive recall and motor skills rapidly and initiate critical actions | 1. Successfully complete objective (true/false, multiple choice, matching, case study) biomedical science exams designed to assess whether students can apply knowledge learned to new situations |  |</p>

 REVIEW AND NOTIFICATION
The major criteria for rating applicants are academic excellence, commitment to osteopathic primary care, commitment to practice medicine in an underserved area, and personal characteristics. Academic excellence is measured by assessing results of the MCAT and academic performance. The degree of difficulty of the program which the applicant studied is also considered. No interview is involved in this assessment.

After the initial assessment, selected applicants are invited to visit the campus for a formal personal interview. After the interview, the Admissions Committee reviews the applicants’ files and makes recommendation to the dean, and applicants are notified as soon as a final admissions decision has been made.

An acceptance fee is required from successful applicants (see Tuition). Acceptance is conditional until all required documentation is received and completed to PNWU’s satisfaction. Transcripts must be on file prior to matriculation.

PNWU is a private institution and encourages applications from qualified students who are interested in pursuing a career in osteopathic medicine. Qualified applicants from Alaska, Idaho, Montana, Oregon, and Washington, and rural and/or medically underserved areas of the country will be given preference for admission to PNWU.

PNWU-COM does not usually defer admission, requests submitted to the Admission Committee will be reviewed and a recommendation made to the dean.

Note: Intentional misrepresentation or omission of information relative to scholastic records or test records will subject the student to dismissal. The University reserves the right to deny admission to any applicant for any reason it deems sufficient.

FINAL OFFICIAL TRANSCRIPTS
Applicants accepted for admission are required to submit final, official, transcripts from each college or university ever attended. The transcript must come directly from the college or university. Foreign transcripts must be evaluated for US equivalence by an approved evaluation service.

MEDICAL HISTORY AND IMMUNIZATIONS
Applicants accepted for admission are required to submit medical history and physical examination information on a form that has been completed and signed by a licensed physician within one year prior to the student’s first year of medical school.

PNWU, in conjunction with requirements of all hospitals accredited by the Joint Commission on Accreditation of Healthcare (JCAHO/Healthcare Facilities Accreditation Program (HFAP)) and Center for Disease Control recommendations for Health Care Providers (Immunization of Health-Care Personnel: Recommendations of the Advisory Committee on Immunization Practices (ACIP) Recommendations and Reports November 25, 2011 / 60(RR07);1-45), adheres to the following, immunizations
must be current as of start of classes of the student’s first year and maintained thereafter:

- **Tuberculosis testing yearly**: A two-step PPD skin test or QuantiFERON-TB test is required within six months of matriculation and completed prior to matriculation. PPD skin testing or QuantiFERON-TB testing is required annually thereafter.
  - If results are positive, provide evidence of either a negative QuantiFERON-TB test or evidence of treatment from a licensed health care provider and then a chest x-ray (repeated every three years).
- **Hepatitis B**: documentation of three vaccination series and a Hepatitis B Surface Antibody titer.
  - If negative or equivocal repeat series of three vaccinations then re-titer six to eight weeks later.
  - If negative or equivocal again, see health-care provider to be tested for HBsAg and anti-HBc to determine infection status.
- **Tetanus toxoid**: documentation of immunization within last ten years
- **Tdap**: Required (after 2005)
- **DPT**: Primary series of four doses with D-tap or DPT. Titer documentation of immunity if vaccine record is unavailable.
- **MMR immunization**: Primary series of two-dose vaccine. Titer documentation of immunity if vaccine record is unavailable.
- **Varicella Status**: Documentation of two-dose vaccine. Titer documentation of immunity if vaccine record is unavailable.
- **Polio (Type OPV/IPV)**: Childhood four dose series or adult three-dose series. Titer documentation of immunity if vaccine record is unavailable.
- **Influenza annually**, once vaccine is available.

Third- and fourth-year students may be required by the facility at which they rotate to have additional immunizations. Students must comply with these requests and pay for them at their own expense.

**CREDIT FOR EXPERIENCE**

Advanced standing is not granted based upon experience.

**CREDIT BY EXAMINATION**

Advanced standing is not granted. However, students presenting extraordinary admission credentials may be granted credit in the appropriate course(s) if all of the following criteria are satisfied:

- The credit must have been earned at an accredited college or university;
- Upon approval by the associate dean for academic affairs, a special examination will be administered under the auspices of the applicable department; and
- A minimum score of 80 percent is earned on the examination.
Those obtaining credit by examination only receive a pass (P) and therefore no percentage is given which therefore is not included for ranking purposes.

**STUDENT TRANSFERS AND WAIVERS**
PNWU does not accept transfers, credits, or waive the requirements set forth in the admissions process.

Transfer of PNWU credits to another college or university is at the discretion of the other institution.

**RECOMMENDING A STUDENT FOR ADMISSION**
Persons wishing to recommend a student for admission should write to the Admission Committee on behalf of the applicant. This letter will be given full consideration when the applicant’s file is evaluated.

**READMISSION POLICY AND PROCEDURES**
In most instances, students withdrawing from PNWU, regardless of the reason, must apply for readmission. To apply for readmission, the applicant should submit a letter to Enrollment Services at least three months in advance of the time the applicant wishes to re-enroll. The letter must include reasons for withdrawal from school, status/activities involved with since withdrawal, and reasons to be considered for readmission. The applicant for readmission may also include any supportive documentation he/she feels the Admissions Committee should consider.

The Admissions Committee will consider the letter of application for readmission and may ask for letters of reference, medical documentation, etc., and review the student’s credentials on file with Enrollment Services. The Admissions Committee has the right to conduct interviews, secure documentation, evaluate past grades/performance, etc. Since the reason each applicant leaves is unique, the information required by the Admissions Committee may vary. The Admissions Committee makes a recommendation to the dean. The dean or dean’s designee will establish placement and academic conditions for readmission.

**MILITARY READMISSION**
Any student whose absence from Pacific Northwest University of Health Sciences (PNWU) is necessitated by reason of service in the US Armed Forces, National Guard or other military reserve component shall be entitled to re-admission upon meeting any eligibility and re-admission requirements.

A student shall be permitted to withdraw from one or more courses without a failing grade, incomplete or other negative annotation or alteration of grade point average, or be given an incomplete and be permitted to complete the course upon release from active duty, or continue and complete the course for full credit with any absences due to service treated as excused.
Eligibility
This policy applies only to US Military veterans seeking re-admission to the program which they previously attended; it does not apply to individuals seeking admission to a different school at PNWU. A student is eligible for re-admission under this provision if, during the leave, the student performed or will perform voluntary or involuntary active duty service in the US Armed Forces, including active duty for training and National Guard or Reserve service under federal authority, for a period of more than 30 consecutive days, and received a discharge other than dishonorable or bad conduct, or performed or will perform voluntary or involuntary duty with the national guard or any other military reserve component under state authority for a period exceeding 30 days or is ordered to federal active military service. In general, the cumulative length of absence and all previous absences for military service (service time only) must not exceed five years.

Requirement of Notice
A student planning to take a leave for military service, must give advance written or verbal notice of military service to the dean or dean's designee, unless such notice is precluded by military necessity. To be readmitted, notice (written or verbal) of intent to re-enroll must be given to the dean or dean’s designee no later than three years after the completion of the period of service. If recovering from a service-related injury or illness, the school must be notified no later than two years after recovery.

A student who does not submit timely a notification of intent or provide an attestation within the designated time limits may not be eligible for the benefits outlined herein.

Readmission Requirements
The school must allow the student to re-enroll in the next class or classes in the same program, with the same enrollment status, number of credits, and academic standing as when he or she was last in attendance at PNWU. The student may also request a later date of admission or, if unusual circumstances require it, the institution may admit the student at a later date. If the school determines that the student is not prepared to resume the program where he or she left off, the school must make reasonable efforts at no extra cost to the student to enable the student to resume and complete the program. Such reasonable efforts include, but are not limited to, providing a refresher course and allowing the student to retake a pretest, as long as the student does not place an undue hardship on the school. If reasonable efforts are unsuccessful or the school determines that there are no reasonable efforts that the school can take, the school is not required to readmit the student. In evaluating re-admission, PNWU will comply with the requirements of any more beneficial Washington State Law. Upon re-admission the dean of the appropriate college will evaluate readiness to resume the education program.
If the program to which the student was admitted is no longer offered, the student must be admitted to the program that is most similar, unless the student requests or agrees to admission to a different program.

The re-applicant must provide proof of compliance with minimal technical standards, the codes of academic and behavioral conduct, criminal background check, and drug screen.

**Tuition and Fees**
For the first academic year in which the student returns, he or she must be readmitted with the same tuition and fees charges the student was or would have been assessed for the academic year when the student left, unless there are sufficient veterans’ educational benefits or other service member education benefits to pay the increased amount of tuition and fees. For subsequent academic years, the student may be charged the same tuition and fees as other students in the program.

**Service for thirty days or less**
A student who is a member of the Washington National Guard or any other military reserve or guard component who is ordered for a period of 30 days or less to either active or inactive state or federal service and as a result of that service, or follow-up medical treatment for injury incurred during that service, misses any class, test, examination, laboratory, or class day on which a written or oral assignment is due, or other event upon which a course grade or evaluation is based, is entitled to make up the class, test, examination, laboratory, presentation, or event without prejudice to the final course grade or evaluation. The makeup must be scheduled after the member’s return from service and after a reasonable time for the student to prepare for the test, examination, laboratory, presentation, or event.

Class sessions a student misses due to performance of state or federal active or inactive military service must be counted as excused absences and may not be used in any way to adversely impact the student’s grade or standing in class.

If the faculty member teaching the course determines that the student has completed sufficient work and has demonstrated sufficient progress toward meeting course requirements to justify the grade without making up the class, test, examination, presentation, or other event, the grade may be awarded without the makeup, but the missed class, test, examination, laboratory, class day, presentation, or other event must not be used in any way to adversely impact the student’s grade or standing in the class.

**TUITION**
Tuition is due and payable in full at registration unless special arrangements have been made with Enrollment Services.
All tuition and fees are subject to change annually. The PNWU Board of Trustees reserves the right to change the schedule of tuition and fees without advance notice, to make such changes applicable to present as well as future students, and to establish additional fees or charges for special services whenever, in their opinion, such actions are deemed advisable.

**FEES**

**Application Fee**
A nonrefundable fee of $85 is payable upon submission of a supplemental application for admission.

**Acceptance Fee**
A nonrefundable fee of $1,000 is payable after a student has been accepted to PNWU. Payment is credited toward tuition upon matriculation. Those accepted on or after October 15 will have until December 14 (or 30 days after receiving an offer of admission, whichever date is later); those accepted on or after December 15 will have 30 days; those accepted on or after January 15 will have 14 days; and those accepted on or after June 15 may be asked for an immediate deposit.

**Criminal Background Check Fee**
A criminal background check (CBC) is required prior to matriculation and prior to beginning clinical rotations. The cost of the CBC is established by the company contracted by PNWU to provide this service. Instructions for the criminal background check will be delivered via email.

**Diploma Replacement Fee**
The fee for each additional or replacement diploma is $25.00.

**Drug Screening Fee**
A random drug screening is required prior to matriculation and whenever it is requested of a current student. The cost of the drug screen is established by the company providing the service.

**End of Rotation Retest Fee**
A student who has failed the required end of rotation examination must remediate by retaking the examination, at their own expense of a $40 retest fee.

**Library Fees**
Students are required to pay for any overdue, lost, or damaged materials from the PNWU Library collection or from interlibrary loan. Fees are variable according to the infraction. See the Library policy for details: [https://secure.compliancebridge.com/pnwu/public/index.php?fuseaction=print.preview&docID=118](https://secure.compliancebridge.com/pnwu/public/index.php?fuseaction=print.preview&docID=118).
NSF Fee
A fee of $25 is charged for returned checks, rejected ACH payments, etc.

Transcript Fee
A fee of $10.00 is charged for each requested transcript, not to exceed $30.00 for same day requests.

Tuition Late Fee
Registration obligates students for payment of all tuition. If tuition is not paid by the due date, students will be assessed a $50 late fee and be liable for any other reasonable collection costs and charges. Students with unpaid University charges may not proceed or register for classes and may be discharged from PNWU. Books, supplies and grades will be held until payment is received.

No course, clerkship, or rotation will be credited toward promotion, graduation, or subsequent credit if a student has not paid the required tuition, including any additional tuition incurred by repeating any portion of the regular program.

BOOKS, SUPPLIES, USAGE, AND MEMBERSHIP
The following items are provided to each student at no additional charge.
- iPad (issued first year)
- all required texts and workbooks
- stethoscope (issued first year)
- ophthalmoscope (issued first year)
- otoscope (issued first year)
- a lab coat and scrub suit (issued first-year)
- technology use
- laboratory use
- American Osteopathic Association (AOA), Student Osteopathic Medical Association (SOMA), and Washington Osteopathic Medical Association (WOMA) annual dues
- Long Term Disability Insurance

Replacement of PNWU provided equipment; supplies or books are at the expense of the student.

ORIENTATION & WHITE COAT CEREMONY
All new, first year students are required to attend an orientation and white coat ceremony.
THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)
The Family Educational Rights and Privacy Act (FERPA) of 1974 is a federal law governing access to student education records. FERPA stipulates conditions for release of information from education records and affords students the opportunity to review and seek revision of those records. Pacific Northwest University of Health Sciences (PNWU) accords all the rights provided by the law and reserves for itself the right to use and release student education records under the conditions specified by the law.

Education records, as defined by FERPA, include admission, academic, financial aid, placement records, and other information directly related to students with the exception of:

- Police records created by PNWU for the purpose of law enforcement;
- Student health records that are created and used solely in connection with the provision of health care;
- Employment records that relate exclusively to individuals in their capacities as employees; and
- Alumni or other post-attendance records.

FERPA regulations apply only to records held for institutional use concerning students who enroll at the University; they do not govern records of applicants who are denied admission or who choose not to attend the University, nor do they govern records kept by a University official that are the sole possession of the maker and are not normally revealed to anyone else except a temporary substitute (e.g., temporary reminder notes).

FERPA stipulates that institutions may not disclose personally identifiable information contained in education records without a student’s written consent, except under conditions specified by FERPA. Information is considered personally identifiable if it contains a student’s name or the name of family members, a student’s local or family address, an identification number, or descriptions or data sufficient to identify an individual.

FERPA permits access to student education records for school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic, research, or other staff position (including those in law enforcement and health care); a person serving on the Board of Trustees; or an individual or organization with whom the University has contracted to serve as its agent or to provide services in support of its operations (examples include attorneys, auditors, collection agents, and the National Student Clearinghouse). Student employees, students serving on official committees, and students serving in other positions in which they assist a University employee in performing her or his official tasks are also considered school officials. No student employee shall have access to student education records within the college of their program. A school official has a
legitimate educational interest in a student education record if the official needs to review the record in order to fulfill her or his professional responsibilities or official tasks.

With certain exceptions allowed by the law and listed below, no persons outside the University shall have access to, nor will the institution disclose any information from, a student's education record without the written consent of the student. FERPA permits information to be released from education records without written consent of the student to the following officials and agencies:

- Officials of other institutions to which students are applying to enroll
- Persons or organizations providing financial aid
- Individuals and organizations charged with oversight of the University, or of federal or state programs in which the University participates
- Accrediting agencies
- Parents of any student under the age of 21, regardless of the student's dependency status, in cases where the student has violated laws or University rules governing alcohol or controlled substances
- Persons as directed by a judicial order or lawfully issued subpoena, provided the University makes a reasonable attempt to notify the student in advance of compliance (unless directed by judicial authorities not to disclose the existence of an order or subpoena)
- Persons in an emergency to protect the health or safety of students or other persons
- The Immigration and Naturalization Service under the terms and provisions of immigration law

With the exception of alcohol and drug violations, PNWU does not release information from student education records to parents without the written consent of students.

FERPA permits the University to release information concerning violent crimes and non-forcible sex offenses (statutory rape or incest) committed by its students. Victims of an alleged violent crime or non-forcible sex offense may be informed of the final results of University disciplinary hearings concerning the allegation. When a student is an alleged perpetrator of a violent crime or a non-forcible sex offense and the University concludes with respect to that allegation that the student has violated University rules, the University may release to the public the name of the student, the offense committed, and the sanction the University imposes against the student.

FERPA further allows student education records to be released to individuals or organizations performing research on behalf of, or in cooperation with, the University. When education records are released for research purposes, FERPA requires the University and its research partners to implement procedures to safeguard their confidentiality. In addition, records released for research must be returned or destroyed when the research is completed, and research findings may not be presented in a manner that makes it possible to identify confidential data from an individual's
education record. PNWU will release information from student education records to outside researchers only under the conditions specified by FERPA and only to those that agree in writing to safeguard the confidential information contained therein.

At its discretion, PNWU may publish or release directory information in accordance with the provisions of FERPA. Directory information includes student name, University and permanent home address and telephone number, e-mail address, a photograph, date of birth, dates of attendance, enrollment status, class, major fields of study, previous institutions attended, awards and honors (including honor roll), degrees conferred (including dates), residency placement, and participation in officially recognized activities. Students may withhold directory information by giving written notification to Enrollment Services within two weeks after the beginning of the term. Requests for non-disclosure of directory information will be honored until graduation unless students submit a written request to have the block on their directory information removed. Students who wish to withhold directory information after they graduate, which would include their dates of attendance and degrees conferred, must submit another written request to Enrollment Services.

FERPA provides students with the right to inspect and review information contained in their education records, to challenge the content and accuracy of those records, to have a hearing if the outcome of the challenge is unsatisfactory, and to submit explanatory statements for inclusion in their files if they disagree with the decisions of the hearing panel. Enrollment Services has been designated by PNWU to establish procedures by which students may review their education records.

Students wishing to review their education records should submit a written request, clearly specifying the records of interest, to the official responsible for maintaining those records. Enrollment Services will assist in identifying the appropriate official. The responsible official will then make arrangements for the student to inspect the records within 45 days of the request and will notify the student of the time and place of inspection. Students may have copies made of their records with certain exceptions (e.g., students may not have a copy of academic records for which a financial “hold” exists, or a transcript of an original or source document produced by another institution or by a person not employed by PNWU). Copies will be made at the student’s expense at prevailing rates, which are listed in Student Affairs.

Only records covered by FERPA, as delineated in the paragraph defining education records, will be made available for inspection. (However, students may have their health records reviewed by their own physicians.) Furthermore, the University is permitted or required to withhold from students the following sorts of records: financial information submitted by their parents, confidential letters of recommendation to which students have waived their rights of inspection, and education records containing information about more than one student. In the latter case, the institution
will permit access only to the parts of education records that pertain to the inquiring student.

Students who believe their education records contain information that is inaccurate, misleading, or held in violation of privacy rights or other rights, may ask the University to amend a record. In such cases, the student should write to the University official responsible for the record, identify the parts of the record the student believes should be changed, and indicate the reasons it should be changed. If University officials agree with the student's request, the appropriate records will be amended. If the University decides not to amend the record as requested by the student, the student will be notified and advised of her or his right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing. FERPA confers to the student the right to challenge grades only in cases where the grade has been miss-recorded. However, PNWU has other procedures for appealing grades.

Student requests for a formal hearing must be made in writing to Student Affairs, who, within a reasonable period of time after receiving such a request, will inform the student of the date, place, and the time of the hearing. Students may present evidence relevant to the issues raised and may be assisted or represented at the hearings by one or more persons of their choice, including attorneys, at their own expense. The hearing panels that adjudicate such challenges are appointed by Student Affairs. The decisions of the hearing panel will be based solely on the evidence presented at the hearing and are final. They will consist of written statements summarizing the evidence and the reasons for the decision and will be delivered to all parties concerned. If the decision is in favor of the student, the education records will be corrected or amended in accordance with the decision of the hearing panel. If the decision remains not to amend the student's education record, the student has a right to insert a statement in her or his record commenting on the information therein. This statement will be maintained as a permanent part of the student's record and must be included when the record is disclosed to an authorized party.

Students who believe the adjudications of their challenges were unfair, or not in keeping with the provisions of FERPA, may request the assistance of the President of Pacific Northwest University of Health Sciences. Students who believe their FERPA rights have been violated may also file complaints with The Family Policy Compliance Office, US Department of Education, 400 Maryland Avenue S.W., Washington, DC 20202-4605 (http://www.ed.gov/offices/OM/fpco/).

REGIONAL SITE PLACEMENT
PNWU third- and fourth-year curriculum delivery occurs through the regional sites located in a five state target area of, Alaska, Idaho, Montana, Oregon, and Washington. In the second year of the curriculum, students will be designated to a regional site. Regional site placement procedures are designed to support the mission of PNWU-
COM to recruit students to meet the health care workforce needs of the rural and medically underserved in the Pacific Northwest.

In the admission process, preference is given to students from within the Pacific Northwest region, rural, or medically underserved areas. It is the goal of regional site placement to return students to areas within the Pacific Northwest region where they have significant ties as much as possible. In this process, students from outside the Pacific Northwest region may be placed in regional sites that strengthen PNWU-COM’s program rather than areas of their preference.

After site placement has been posted, students will have one week (seven calendar days) to request a trade with another student. The trade will be recognized when all parties, including personnel from Student Affairs, have reached an agreement. If any possibility of unprofessional conduct or behavior has occurred, no change will be recognized. All parties must be 100 percent agreeable to this exchange. The final decision and notification will be made by Student Affairs.

Students will complete appropriate paperwork, (signed contracts) and the official list will be posted by Student Affairs. At the end of this period, the site selection process will be considered complete.

Any appeal based on documented extenuating circumstances must be submitted in writing to the Assistant Dean of Clinical Education for consideration. Changes will be processed by Clinical Education.

**GRADES**

**For Examinations:**
Determination of a passing score will be based on the mean minus one standard deviation from the mean, with a minimum score of 65 percent. If the mean minus one standard deviation from the mean is greater than 70 percent, 70 percent will be set as the passing score. If the mean minus one standard deviation from the mean is lower than 65%, 65% will be set as the passing score.

**For Courses:**
Grades will be determined based on the contribution of the scores for all examinations and other assessments divided by the total of all points associated with those assessments. Consideration will be given for exams that are unevenly weighted, as well as for contributions to the final grade by inclusion of quizzes and other assignments as per the course syllabus.

Student’s percentage grades will be used for purposes of ranking, not reported on the transcript. Ranking is determined at the end of the second academic year. Incomplete course grades may be made up under the supervision of the associate dean for academic affairs; however, no grade above 70 percent will be granted. Under
extenuating circumstances beyond the student’s control, incomplete grades may be made up with 70 percent or better. Such exceptions would be considered upon the recommendation of the student progress committee.

Students must remediate all failures/incompletes prior to beginning the next successive academic year. The student is not in good academic standing until the failures/incompletes are successfully remediated in a timely manner determined by the Student Progress Committee. See the section on Remediation for details about the remediation process and how remediated grades will be noted on the student’s transcript.

The course director will submit a final course grade report within seven working days after the final course assessment for preclinical courses. The course grade report will include the pass or fail. Students may access an unofficial transcript and grade report on-line at any time.

For clinical courses, failure to complete logs, evaluations, and rotation exams within 60 days of the last day of the rotation will result in an academic standing of alert, and a grade of incomplete will be given. At the end of the academic year, rotations that remain incomplete will be given a grade of fail (F). Rotations ending within 60 days of the end of the academic year will have the full 60 days to complete logs, evaluations, and rotation exams. Students will be withdrawn from rotations until all grades are remediated and documentation is current.

Grading policies for each individual course will be provided within the course syllabus, including course description, learning outcomes and objectives.

The results of examinations and reports concerning attendance, conduct, and potential professional attributes are submitted to the Student Progress Committee by Student Affairs. The Committee determines the student’s eligibility for promotion and graduation.

**HONORS**
Honors will be designated for the top 15 percent in first and second year courses except where excluded in the course syllabus. Honors will be designated for the top 15 percent, as of July 1 after the third year, based on core rotation exams and clinical performance.

**GRADE POSTING**
PNWU adheres to the grade posting practices recommended under FERPA. Grades are not posted in a public manner either by student name, social security number, or student identification number. Faculty members, or their designee, will post grades in the PowerCAMPUS Self-Service system. FERPA permits the posting of grades in a
public manner only if the student is assigned a unique identifier known only to the student and the faculty member.

ACADEMIC DUE PROCESS – GRADE APPEAL
1. Meeting with the faculty member: A student who seeks appeal of a particular grade must first speak with the specific faculty member(s) concerned and involve the course director(s) and department chair when appropriate. They may request written documentation/justification from the student if they deem it appropriate. The involved faculty member(s) will then discuss the situation with the student and make a determination. For third- and fourth-year students the regional dean and the assistant dean for clinical education would be the appropriate personnel.
2. Meeting with the Assistant Dean: If the student disagrees with the faculty member(s), he/she may appeal in writing and discuss the situation with an administrator at the next level. For first- and second-year students, appeals can be submitted directly to the associate dean for academic affairs. For third- and fourth-year students the assistant dean for clinical education would be the appropriate person.
3. After hearing from the student and the faculty member(s), the administrator will make an informed decision.
4. Meeting with the Associate Dean for Academic Affairs: If the student disagrees with the decisions at previous levels, he/she may appeal in writing and discuss the situation with the associate dean for academic affairs. After hearing from the appropriate people, the associate dean for academic affairs will make an informed decision.
5. Meeting with the Dean: If the student disagrees with the associate dean for academic affairs they can appeal to the dean, who will make the final decision.

The original appeal must be made within one year of receipt of the grade.

TRANSCRIPTS, DIPLOMAS, AND RECORDS
Permanent education records maintained by PNWU are the responsibility of Enrollment Services. Transcripts of academic records will contain only information regarding academic status. In cases where disciplinary action leads to the student's ineligibility for re-enrollment (dismissal), disciplinary action will become a part of the permanent academic record. Disciplinary records or information from such records will be made available to persons outside of PNWU only on the formal written request of the student involved or as otherwise allowed by law or regulation.

Academic records and financial aid records will be used by PNWU personnel who have legitimate responsibility for the student's personal welfare and when necessary to discharge their official duties. Except for the purpose of official audits, financial aid records will be made available to persons outside the University only upon the formal written request of the student (or graduate) involved or as otherwise allowed by law or regulation.
Student health records will be maintained by PNWU as prescribed by professional ethics and federal and state laws.

An official copy (signed and sealed) of a transcript of record will be transmitted directly to a legitimate educational institution, hospital, or governmental or non-governmental agency on written request of the student (graduate) involved.

Unofficial copies of a transcript of record are available to the student (graduate) from the PowerCAMPUS Self-Service.

Students who have not fulfilled their financial and other obligations to PNWU shall not have transcripts or recommendations made available until such obligations are met.

If the University has knowledge that a student or graduate is in default on a federal, state, outside agency, or institutional loan or service obligation, the University will withhold all official transcripts, National Board scores, and letters of recommendation for internships, residencies, employment, staff privileges, specialty certification, and licensing.

Diplomas will be mailed to students after the graduation ceremony and upon completion of all graduation requirements as laid out in this catalog.

Students who have not received a diploma due to failure to satisfactorily fulfill their obligations to the University prior to the date of graduation and who have failed to do so following graduation shall not have the privilege of receiving transcripts, other records, or recommendations sent to any institution or entity until such obligations are cleared.

A request for duplicate diplomas can be made to Enrollment Services.

Questions or concerns regarding records and grades should be brought to Enrollment Services.

**ACADEMIC STANDING**

Satisfactory academic progress occurs when the student passes all required courses, completes 67 percent of their cumulative attempted credits, completes their degree within 150 percent of their four-year program, passes the Comprehensive Osteopathic Medical Licensing Examinations (COMLEX-USA Level 1, Level 2CE, Level 2PE), and maintains the standards of ethical, moral, personal and professional conduct required for continued study of osteopathic medicine. A student who is not making academic progress is not eligible for federal Title IV financial aid.

The academic progress of each student is monitored and evaluated at the end of each term by the Student Progress Committee. A student failing to meet one or more of the
standards of progress at the end of summer or fall term may be placed on Warning. Failure of two courses in a single academic year will result in an automatic dismissal without the opportunity for remediation. While on Warning, the student may receive financial aid for spring term. At the end of spring term, the student must be in good standing or may appeal to be put on a Probation status.

A student must be in good academic standing at the end of the spring term of the second year in order to participate in clinical rotations. No student may advance a year at PNWU with a failing or incomplete grade in any required course.

- Course withdrawals and repeats are only allowed as part of a Probationary Academic Plan as approved by the Student Progress Committee.
- Transfer credits are currently not accepted by PNWU.

Students may access their grade report from the PowerCAMPUS Self-Service system at the close of every academic term. Their Academic Standing status will be reported on the grade report. The student will receive a letter of Academic Standing if he/she is placed on Alert, Warning, or Probation status.

1. **Alert:**
   - **First Year Students:** occurs automatically when a student’s mid-term grade is failing.
   - **Second Year Students:** occurs automatically when a student’s mid-term grade is failing or fails a course that ends before the end of term.
   - **Third and Fourth Year Students:** occurs upon failure of a Comprehensive Osteopathic Medical Achievement Test (COMAT) exam. Also occurs upon failure to complete logs, evaluations, and rotation exams within 60 days of the last day of the rotation.

2. **Warning:**
   - occurs automatically at the end of fall term when a student does not meet academic progress or fails the first attempt of any level of COMLEX-USA board exam. The Student Progress Committee may also assign warning to a student who has not maintained professional and/or ethical conduct.

3. **Probation:**
   - the Student Progress Committee may assign to a student who has successfully appealed to be reinstated after not achieving academic progress at the end of the academic year, or has not maintained professional and/or ethical conduct.

A student on warning or probation status may not participate in PNWU-sponsored extracurricular events or organizations, is not eligible for PNWU sanctioned travel, and may not run for or hold the position of executive, class, or club officer. At the discretion of the Student Progress Committee, warning or probation status may include additional restrictions from activities the Committee deems detrimental to academic performance. Since academic grades are only one criterion for warning or probation status, the Student Progress Committee may recommend warning or probation status regardless of a student’s academic performance.
The imposed academic standing will be in effect until the student is in good academic standing. Good academic standing is regained by successful summer remediation of a failed course (years one and two) or successfully passing or removing the deficiency (years three or four). In the event a student is placed on warning or probation status for a non-academic reason, removal of the status will be at the discretion of the Student Progress Committee, and may potentially remain in place until graduation.

Academic alert and warning shall have no effect on a student’s financial aid and will not appear on the transcript. Probation status may affect a student’s eligibility for financial aid and will not appear on the transcript. Please refer to the Financial Aid policies for more information.

**APPEAL**

If a student is considered by the Student Progress Committee due to their lack of academic progress, the student will be notified when the Student Progress Committee will meet. The student will have the opportunity to present to the committee any mitigating circumstances which directly contributed to the poor academic performance. The student may choose one of the following:

a) appear in person to make a personal statement (~three to five min.) and answer any questions by the committee;
b) provide a written statement (~one page double spaced) that will be read by the chairperson to the committee or
c) provide no explanation at all.

The Student Progress Committee will make a recommendation to the associate dean for academic affairs who will notify the student of the final decision. Students who wish to appeal a decision based on extenuating circumstances must submit a detailed letter to the dean within five (5) business days after receiving the dismissal notice. The decision of the dean is final.

**GUIDELINES REGARDING STUDENT MISCONDUCT**

These guidelines are advisory and are not a contract. They do not bind PNWU and may change with 1) approval of the dean, 2) notice to the chairperson of the Student Progress Committee, and 3) general notice to the students of PNWU.

**Filing of a Complaint of Professional or Personal Misconduct**

If an individual has violated PNWU policy regarding professional and/or ethical conduct, a complaint should be filed with the chairperson of the Student Progress Committee. The complaint should be filed within 30 calendar days of the incident. The Committee will review the complaint and may schedule a meeting with the student and complainant(s).
Notice to Appear Before the Student Progress Committee
If a meeting is warranted, a Notice to Appear before the Student Progress Committee will be delivered or sent to the student. The failure of addressee to accept mail or maintain a deliverable address with Student Affairs may result in immediate disciplinary action.

Appearance Before the Student Progress Committee
Student Progress Committee meetings with students are private and confidential including, but not limited to, the names of participants, proceedings, discussion, minutes, and findings. The following are prohibited in all Student Progress Committee meetings unless otherwise authorized in writing by the dean and Student Progress Committee chairperson: 1) electronic recording of the meeting, except for official minutes; 2) legal counsel; and 3) uninvited individuals.

In the meeting(s) the student will be given reasonable opportunity to address the allegation(s) against him/her. The Committee will review all submitted documents and may interview all persons reported as having knowledge of the incident. The Committee may have more than one meeting with the student in order to address the concerns of the Committee and give the student an opportunity to fully respond to the questions and allegations.

Committee Findings
The findings of the Committee may take one of four forms:
1. No Action
2. Warning
   Serves as a warning that any future behavior/situations inconsistent with the professional behavior outlined in the Catalog or deemed inappropriate by the Student Progress Committee may result in his/her immediate dismissal from PNWU. Any student put on Warning status will remain so for the stated time.
3. Probation
   The student’s continued enrollment at PNWU is based upon a successful appeal of a dismissal decision and of the student fulfilling certain obligations as set forth by the Student Progress Committee.
4. Dismissal

The Student Progress Committee will make a recommendation to the associate dean for student affairs who will notify the student of the final decision. The student may appeal the decision to the dean if the student does not believe due process was properly followed, or if new and contributing information is relevant that has not been presented. The Dean’s Office must be notified in writing of the intent to appeal within ten calendar days of receipt of notice of disciplinary action.
REMEDIATION
Remediation of a single failed course will occur following the spring term according to the University calendar. All students who fail a course will be required to meet with the Student Progress Committee to discuss their academic situation. Failure of a second course in a single academic year will result in an automatic dismissal without the opportunity for remediation. Failure of a course remediation will also result in an automatic dismissal. Students who wish to appeal a decision based on extenuating circumstances must submit a detailed letter to the Dean within five (5) business days after receiving the dismissal notice. The decision of the Dean is final. See the Academic Standing section for the Student Progress Committee review and appeal section.

The associate dean for academic affairs oversees the remediation process, in consultation with the course director for the failed course and the learning skills specialist. Students must remediate a failed course and complete all course work prior to taking the COMLEX-USA board exam and promotion to the next year.

A failing grade will be designated as incomplete (I) until such time as the course has been remediated. Successful remediation will result in a change from incomplete (I) to pass (P) on the transcript.

The percentage grade recorded from the remediated course in no case can be greater than a 70 percent, which will be the grade used to determine the student’s class ranking at the end of second-year. Unsuccessful remediation will result in a change from incomplete (I) to fail (F) on the transcript.

Remediation of a Rotation
A failed core rotation must be repeated, which may be at another regional site. The repeated rotation will be at the student’s expense and scheduled at the discretion of the regional dean and assistant dean for clinical education.

Failure of an elective rotation requires remediation by repeating the rotation. No student may be promoted to the next year or approved for graduation with a failing or incomplete grade in any course.

Remediation of COMLEX-USA Level 1
Remediation after first failure of COMLEX-USA Level 1 will require the student to take time away from rotations. The student may need to return to the Yakima campus of PNWU for a structured board review at the end of their current rotation. Students may need to remain in the Yakima area until completion of the review with proof of the required Comprehensive Osteopathic Self-Assessment Examination (COMSAE) score. The decision for the student to return to clinical rotations at a regional site must be mutually agreed upon by the assistant dean of clinical education and the regional dean.

Remediation after second failure of COMLEX-USA Level 1 will require the student to take time away from rotations at the end of their current rotation. The board
preparation coordinator and learning skills specialist will recommend a written individualized remediation plan to the Student Progress Committee which could include:

- COMLEX Boot Camp or other similar program
- Remediation of some on-campus pre-clinical courses
- Studying under the direction of the board preparation coordinator and learning skills specialist which may require a return to Yakima

Failure to pass COMLEX-USA Level 1 on the third attempt may result in dismissal.

**Remediation of COMLEX-USA Level 2CE**
Remediation after first failure of COMLEX-USA Level 2CE will require the student to complete online courses and obtain a required score on the Level 2CE Comprehensive Osteopathic Self-Assessment Examination (COMSAE). The student must submit their COMSAE score to the learning skills specialist or their designee prior to their COMLEX-USA Level 2CE test date.

Remediation after second failure of the COMLEX-USA Level 2CE will require the student to take time away from rotations at the end of their current rotation. The assistant dean of clinical education, learning skills specialist, and regional dean will meet to recommend a written individualized remediation plan which could include:

- COMLEX Boot Camp or other similar program
- Studying under the direction of either the regional dean or learning skills specialist

Failure to pass COMLEX-USA Level 2CE on the third attempt may result in dismissal.

**Remediation of COMLEX-USA Level 2PE**
Remediation after a first failure of COMLEX-USA Level 2PE will be an individualized remediation plan designed by the board preparation coordinator and learning skills specialist.

Remediation after a second failure of COMLEX-USA Level 2PE will require the student to take time away from rotations at the end of their current rotation. The assistant dean of clinical education, learning skills specialist, and board preparation coordinator will meet to recommend an individualized study plan.

Failure to pass COMLEX-USA Level 2PE on the third attempt may result in dismissal.

**GRADUATION REQUIREMENTS**
A student who has fulfilled all the academic requirements within 150 percent of his/her four-year program, except where an exception is required by law, will be granted the degree of Doctor of Osteopathic Medicine provided the student:

- Has complied with all the curricular, legal, and financial requirements of the University
- Attends, in person, the commencement ceremony
o The student will participate in commencement ceremony if requirements will be met before the end of the calendar year

- Has met requirements for graduation that include passage of COMLEX-USA Level 1, 2CE, and 2PE
- Is at least 21 years of age
- Has demonstrated the ethical, personal, and professional qualities deemed necessary for the successful, continued study and practice of osteopathic medicine
- Can meet the minimum technical standards
- Has demonstrated suitability for the practice of medicine as evidenced by the assumption of responsibility for patient care and integrity in the conduct of clinical activities
- Has obtained approval from the Student Progress Committee, faculty, dean, president, and Board of Trustees of PNWU
- Is free from any outstanding medical debts to the University’s affiliated hospitals or clinics
- Has attended and completed required exit sessions as determined by PNWU i.e. loan counseling, etc.

REQUIREMENTS FOR PRACTICE
Each recipient of the DO degree must fulfill the requirements of the state licensing board of the state in which the physician chooses to practice. These requirements vary widely and are regulated by the laws of each state. Refer to the Federation of State Medical Boards, [http://www.fsmb.org/about-fsmb/directory-hub](http://www.fsmb.org/about-fsmb/directory-hub), or Physician Licensing Service, [http://physicianlicensing.com/resources/state-requirements/](http://physicianlicensing.com/resources/state-requirements/) websites for details.

PNWU-COM EDUCATIONAL OBJECTIVES
The PNWU-COM Educational Objectives within the osteopathic medical education curriculum are guided by the National Board of Osteopathic Medical Examiners (NBOME, 2011) Fundamental Osteopathic Medical Competency Domains. The required courses of the osteopathic medical education program explicitly address the following domains:

1. **Osteopathic Principles & Practice and Osteopathic Manipulative Treatment**
   Osteopathic principles and practice: a concept of health care supported by expanding scientific knowledge that embraces the concept of the unity of the living organism’s structure (anatomy) and function (physiology).

   Osteopathic philosophy emphasizes the following principles: (1) The human being is a dynamic unit of function; (2) The body possesses self-regulatory mechanisms that are self-healing in nature; (3) Structure and function are interrelated at all levels; and (4) Rational treatment is based on these principles (Glossary of Osteopathic Terminology, 2009).
Osteopathic manipulative treatment (OMT): the therapeutic application of manually guided forces by an osteopathic physician to improve physiologic function and/or support homeostasis that has been altered by somatic dysfunction. OMT employs a variety of techniques (Glossary of Osteopathic Terminology, 2009).

Somatic dysfunction: impaired or altered function of related components of the somatic (body framework) system: skeletal, arthrodial and myofascial structures, and their related vascular, lymphatic, and neural elements. Somatic dysfunction is treatable using osteopathic manipulative treatment (Glossary of Osteopathic Terminology, 2009).

2. Patient Care
Patient care is the development, maintenance, and conclusion of a therapeutic physician-patient relationship in a manner that has the best interest of the patient in mind. This involves determining and monitoring the nature of a patient’s concern or complaint; appropriately incorporating osteopathic principles and practice and osteopathic manipulative treatment (OMT); and implementing effective, evidence-based, and mutually agreed upon diagnostic and patient care plans, including appropriate patient education and follow-up. In the service of the highest quality of patient care, promotion of wellness, and prevention of disease, the osteopathic physician must be able to appropriately lead a health care team and foster effective communication between health care professionals.

3. Application of Knowledge for Medical Practice
The application of knowledge for medical practice is the understanding and application of osteopathic, biomedical, clinical, epidemiologic, biomechanical, social, and behavioral sciences in the context of patient-centered care. This also includes critical-thinking skills required for safe and effective medical practice, including the cognitive skills of understanding, comprehension, application, analysis, synthesis, and evaluation.

4. Practice-Based Learning and Improvement in Medicine
Practice-based learning and improvement is the continuous evaluation of osteopathic clinical practice, utilizing evidence-based medicine approaches to develop best practices that will result in optimal patient care outcomes.

5. Interpersonal and Communication Skills in the Practice of Medicine
Interpersonal and communication skills for medical practice consist of incorporating knowledge, behaviors, and attitudes required: (1) to determine the nature of a patient’s concern or complaint; (2) to develop, maintain, and conclude the therapeutic relationship; and (3) to facilitate patient education and implementation of negotiated diagnostic and care plans. These skills include active listening involving verbal and nonverbal behaviors and effective documentation and
synthesis of clinical findings and impressions in written and electronic format. This set of knowledge, skills, and attitudes extends to the medical interview and to communication with the patient, family members, or caregivers, physician colleagues, and other members of the interprofessional collaborative team. Essential for osteopathic medical practice is that the approach be holistic, comprehensive, and patient-centered, contributing to an understanding of the patient’s perspective and facilitating trust and a therapeutic physician-patient relationship.

6. Professionalism in the Practice of Medicine
Medial professionalism is a duty to consistently demonstrate behaviors that uphold the highest moral and ethical standards in the conduct of medical education, training, research, and practice. This includes a commitment to continuous learning and the exhibition of personal and social accountability.

7. Systems-Based Practice in Medicine
Systems-based practice is an approach incorporating awareness of and responsiveness to the larger context and systems of health care. In addition, it is the ability to effectively identify and integrate system resources to provide medical care that is of optimal value to individuals and to society at large.

PNWU-COM EDUCATIONAL OUTCOMES

Each of the PNWU-COM educational objectives includes a set of discrete educational outcomes defined in course syllabi and measured through a variety of comprehensive assessment strategies which include: objective examinations in courses, written assignments, student portfolios, clinical skills demonstrations (standardized patients, Objective Structured Clinical Examination [OSCE], simulations), national standardized tests (Comprehensive Osteopathic Medical Self-Assessment Examination [COMSAE], Comprehensive Osteopathic Medical Achievement Tests [COMAT], Comprehensive Osteopathic Medical Licensing Examination [COMLEX]), small-group case studies, preceptor evaluations, and individual case presentations. The set of discrete PNWU-COM educational outcomes within course syllabi are guided by overarching NBOME domain outcomes and listed below.

Upon graduation from PNWU-COM, students will be able to:

1. Osteopathic Principles & Practice (OPP) and Osteopathic Manipulative Treatment (OMT)
Demonstrate knowledge of osteopathic principles and practice, and demonstrate and apply knowledge of somatic dysfunction diagnosis and Osteopathic Manipulative Treatment in the clinical setting.
2. **Patient Care**
Provide patient-centered care that is culturally responsive, compassionate, and appropriate for the effective treatment of illness and promotion of health.

3. **Application of Knowledge for Medical Practice**
Demonstrate an understanding and application of the evolving osteopathic, biomedical, clinical, epidemiological, biomechanical, and cognitive (e.g. epidemiological and social-behavioral) sciences to optimize patient care.

4. **Practice-Based Learning and Improvement in Medicine**
Demonstrate the ability to continuously evaluate patient care practices, scientific evidence, and personal beliefs and biases as they relate to improving the care of patients and optimizing patient outcomes.

5. **Interpersonal and Communication Skills in the Practice of Medicine:**
Demonstrate the ability to consistently interact respectfully, empathetically, and professionally with patients, families, allied health care providers, staff, and colleagues, to optimize patient outcomes.

6. **Professionalism in the Practice of Medicine**
Demonstrate a commitment to the highest standards of professional responsibilities and adhere to ethical principles and cultural responsiveness to diverse beliefs and customs.

7. **Systems-Based Practice in Medicine**
Effectively utilize available health care system resources to provide optimal health care to the individual patient and local and global communities.

**CREDIT HOUR DEFINITION**
The credit hour formulas used for determining credit hours at PNWU adheres to the definition of a credit hour as defined by the U.S. Department of Education and as provided in the glossary of the American Osteopathic Association Commission on Osteopathic College Accreditation (AOA COCA) **COM Accreditation Standards and Procedures Manual**.

**Pre-clinical courses the credit hours are determined by the following methods:**
Each contact hour of lecture, presentation, or hour designated to complete an on-line presentation has an expected out of classroom study time of two hours. Therefore one credit hour equals 15 contact hours.

Teaching Laboratory contact hours differ in credit as they do not require the number of hours of preparation outside of classroom activity. Credit hours for laboratory are considered a one to one anticipated time in laboratory to time outside of laboratory to prepare. Therefore one credit hour is assigned to each 30 hours of laboratory time.
Anatomy course laboratory sessions, early clinical experiences (ECE), simulation laboratory experiences, clinical laboratory experiences, or OMM Lab receive a one to one anticipated time in laboratory to time outside of laboratory to prepare. Therefore one credit hour is assigned to each 30 hours of such time.

**Credit hours for Clinical Rotations are determined as follows:**

Four credit hours are awarded for the approximate 160 to 180 contact hours students spend on each four week clinical rotation (or internship, externship, international experience or clinical research experience). The contact hours awarded on a clinical rotation are estimated to have a one to one ratio as preparation for the study is usually spent on the rotation or in completing the required on line curriculum.

**DOCTOR OF OSTEOPATHIC MEDICINE REQUIREMENTS**

The curriculum of medical school differs from that found in other graduate programs in that the curriculum progressively builds. This requires the student to complete certain courses in order or progression to comprehend the foundation on which the clinical curriculum builds. Academic progress requires the student complete each academic year in the progression offered.

</table>

Students must complete all courses in the appropriate sequence.
COURSE INFORMATION

Adolescent Medicine – PED 703 (4-weeks) or PED 703S (2-weeks)
Adolescent medicine is available as a subspecialty elective in the area of pediatrics. The student will be assigned to a trainer or a group of physician trainers who are practicing physician in their specialty.

Adolescent Medicine

Allergy & Immunology – IM 703 (4-weeks) or IM 703S (2-weeks)
The study and management of allergy and immunology is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Anatomy Research – ANAT 601
The purpose of this course is to provide the student with an introduction to basic biomedical research methods with hands-on participation in a novel research project under the guidance of a research scientist. The student will learn how to: 1) search and evaluate the scientific literature for relevant information, 2) design a small research project, 3) perform various biomedical research techniques, 4) complete the planned studies, 5) prepare a final report on these studies, and 6) give an oral presentation of this research at PNWU. This is 6 - 8 week elective course offered during the summer to students who have a strong academic record after the 1st, 2nd, or 3rd year at PNWU. The number of students allowed to enroll each summer will vary. An announcement detailing the application process for this course will be sent out to students at least one month prior to the application deadline.

Anatomy Student Scholars – ANAT 799
The purpose of this course is to provide the student with increased learning opportunities in the medical anatomical sciences of gross anatomy, developmental anatomy, histology, and neuroscience, while at the same time providing the student with opportunities to develop solid teaching skills in these disciplines, and to perform medical research.

Anesthesiology – SURG 703 (4-weeks) or SURG 703S (2-weeks)
Anesthesiology clinical rotation is available as a surgical subspecialty elective. The student will be assigned to a physician trainer or group of physician trainers who are practicing in their specialty. The purpose of this is to familiarize the student to various methods of anesthesia and the skills associated with this specialty. Upon completion of this rotation, the student would have improved basic skills in peripheral venous catheterization and venipuncture. The student should be exposed to various central line catheterizations, intubation, and anesthesia management, including pharmacologic agents used in anesthesia.

Behavioral Medicine – CLIN 618
The Behavioral Medicine course is provided as a requirement of the second year curriculum at PNWU. The course presents a multidimensional approach to the
understanding of the most common clinical entities in psychiatry and behavioral medicine. Additional topics are signs, symptoms, diagnosis, treatment and the biopsychosocial aspects of behavioral medicine. Several of these sections are conducted in work format, allowing maximum participation and interaction of students and faculty.

Behavioral Medicine – BEHSC 701 (4-weeks) or BEHSC 701S (2-weeks)
The study of behavioral science is a four-week rotation. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty. This rotation is designed for students to learn and practice skills necessary for working with patients in a mental health setting. Rapport-building skills and mental health patients are emphasized. Students should develop an awareness of the effects of biological, developmental, sociological, ethnic, and economic background on the presenting problems of patients. Students are expected to establish professional working relationships with members of the multidisciplinary mental health treatment team. Students will develop the ability to communicate effectively with other professionals, support an atmosphere of collegiality, and expand both their medical education as well as personal growth.

Board Exam Preparation – CLIN 604
This course will introduce students to the basic processes involved with registering and preparing for COMLEX-USA Level 1. Live question-and-answer information sessions are given in the fall term along with web-based support and direction. Spring term activities include practice tests and instructional sessions on board review calendar building and study strategies. Lists and access to board resources are provided as well as question banks. Successful completion of the course requires completion of the COMSAE.

Cardio-Thoracic Surgery – SURG 715 (4-weeks) or SURG 715S (2-weeks)
Cardio-Thoracic Surgery is available as a subspecialty elective rotation in surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Cardiovascular Disease – IM 704 (4-weeks) or IM 704S (2-weeks)
The study and management of cardiovascular disease is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Cardiovascular System – CLIN 510
The Cardiovascular System course is provided as a requirement of the second year curriculum at PNWU. The course presents a multidimensional approach to understanding normal cardiovascular function and the prevention, presentation, diagnosis (including EKG interpretation), and treatment of the most common clinical entities in cardiovascular disease.
Clinical Skills I – CLIN 501, 502
This course is designed to provide the learner an opportunity to achieve the recommended clinical skills competencies for undergraduate medical education. Among these skills, the student will be assessed both on knowledge and demonstrated behaviors undergirding interviewing and history taking, performing an evidence-based physical examination, as well as clinical decision making and diagnostic reasoning, leading up to the expert performance of written documentation and a verbal presentation. Through implementation of active learning and integration of the systems based curriculum, the student will have the opportunity to obtain the foundation for making a differential diagnosis, selection of screening and testing methods, and ultimately to diagnosis, framing prognosis and treatment discussions within the core entrustable professional activities for entering residency.

Clinical Skills II – CLIN 601, 602
This course is designed to teach the students how to perform a proper history and physical examination. The student will be assessed not only on the knowledge related to this activity, but also the practical skills related to 1) interviewing and history taking, 2) performing the physical examination, and 3) making clinical judgments. The course will teach the various systems and how to understand the importance of the history and physical examination for detecting pathophysiology. The student will learn to make a differential diagnosis, leading to the selection of "definitive" laboratory studies and then ultimately to diagnosis and treatment. This will occur in small group laboratory sessions moderated by a physician as well as standardized patient encounters and simulation scenarios. The students will also gain the skills of IV insertion, endotracheal intubation, and foley catheter insertion.

Clinical Skills III, CLIN 701
This course will enhance the students skills in obtaining a history, developing a rapport and bedside manner, physical diagnosis, integration of OMM, critical thinking, development of differential diagnoses and soap note writing skills. This will be done in the style of the COMLEX-USA Level 2PE standardized patient encounters as delineated by the orientation guide provided by COMLEX-USA.

Community DOctoring I – CLIN 505, 506
This combination lecture, small group, and problem-based learning course will focus on topics ranging from the behavioral sciences to public health. The emphasis will be to develop the student’s process of clinical decision-making. PNWU curriculum goals regarding lifelong learning, professionalism, self-care, ethics, and social and community contexts of care will be addressed. Other topics include biological correlates of behavior; personality, learning and behavioral change; life-span development; communication and interaction; group processes; family and community socio-cultural patterns of behavior; developmental disabilities, behavioral risk factors and disease; study design; and biostatistics.
Community & DOctoring II – CLIN 605, 606
This lecture, small group, and problem-based learning course will focus on topics ranging from the behavioral sciences to health care systems management and public health. The emphasis will be to develop the student’s process of clinical decision-making. PNWU-COM curriculum goals regarding lifelong learning, professionalism, self-care, ethics, and social and community contexts of care will be addressed. Other topics include biological correlates of behavior, family and community socio-cultural patterns of behavior, behavioral risk factors and disease, health care systems, and medical jurisprudence.

Dermatology – IM 705 (4-weeks) or IM 705S (2-weeks)
Dermatology is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Directed Study – CLIN 513
The Directed Study course is administered by the Associate Dean for Academic Affairs on a case by case basis.

Emergency Medicine – EM 701
Emergency Medicine is a fourth year required four-week rotation. The student will be assigned to a physician trainer or a group of emergency medicine trainers who are practicing in their specialty.

Endocrine System – CLIN 629
This course is an integrated, multidisciplinary study of the endocrine system in health and disease. Emphasis is on pharmacology, pathology, nutrition, and microbiology as related to the diagnosis and clinical management of endocrine disorders. The course presents a multidimensional approach to the understanding of the most common clinical entities in endocrine disease. The course presents the pathophysiology, pharmaceutical or surgical treatments, and adult and pediatric presentations of endocrine diseases. A central format of the course is the presentation of clinical correlations. This format consists of presentation of clinical cases that range from the prototypical to the atypical. Students are given study questions to guide their study on critical components of the diagnosis or treatment of the clinical correlation cases.

Endocrinology – IM 706 (4-weeks) or IM 706S (2-weeks)
Endocrinology is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Family Medicine – FM 701, 702 (4 to 6-weeks) or FM 701S, FM702S (2-weeks)
A family medicine core rotation is required. Each student will be assigned to specific rotations in family medicine. The rotations in family medicine will expand the student's
ability to integrate information obtained from the medical history, physical examination, osteopathic structural examination and appropriate diagnostic modalities into definitive diagnoses.

Family Medicine Sub-Internship – FM 801
Students will serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Students will be able to perform an initial assessment of patients under consideration for admission to the family medicine service. Students will be able to implement diagnostic and therapeutic plans taking into account evidence-based information and patient preferences. Based on their demonstrated knowledge in osteopathic medicine, skills and attitudes, students will be able to participate on an inpatient family medicine team with an advanced degree of independence and responsibility in preparation for their first year of residency. Students will learn to provide osteopathic patient-centered inpatient care and document that care appropriately. Students will be able to provide continuity of care to a limited number of patients who they care for in both the hospital and the ambulatory setting.

Fundamentals of Pharmacology – PHARM 599
This lecture course introduces the basic principles for rational and effective drug therapy.

Gastroenterology – IM 708 (4-weeks) or IM 708S (2-weeks)
Gastroenterology is a subspecialty elective rotation in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Gastrointestinal System – CLIN 627
This multidisciplinary course is designed to assist students in acquiring knowledge and competency in disorders of the gastrointestinal system, pancreas, liver and biliary tract. The student will examine the basic biology and diseases of the digestive system. The course utilizes a comprehensive teaching approach to presenting the common and/or significant clinical problems and disorders of the gastrointestinal system. The faculty will emphasize pathophysiology, clinical manifestations, diagnosis, differential diagnosis, and treatment of these gastrointestinal disorders. Instruction will include lectures, faculty-directed self-study, clinical integration learning sessions (CILs), and virtual microscopy labs.

Genitourinary/Reproductive System – CLIN 603
The female Reproductive System course is comprised of formal didactic lectures in a lecture hall setting, interactive learning sessions, and clinical skills laboratory. The interactive sessions will require preparation of the assigned material prior to class to fully participate in the session.

The course will familiarize the students with the history of osteopathy in women’s care,
anatomy and physiology of pregnancy and birth, the course and management of normal labor, complications of pregnancy and delivery, medical conditions affecting pregnancy, labor and birth, the care of the well woman, pathophysiology of diseases causing gynecologic complaints, neoplastic processes of the breast and female genital tract, and the osteopathic management of the obstetrical and gynecologic patient. It is not possible to thoroughly cover this breadth of material in a four-week course. The goal will be to give an overview of the range of problems encountered by the obstetrician/gynecology with a focus on developing differential diagnostic skills, emphasizing the most common findings. The clinical skills laboratory will provide an opportunity for the student to learn the physical examination of the female patient and practice the female genital examination on simulated patients. Material in OPP laboratories will complement the topics being covered in this course.

Geriatrics – IM 709 (4-weeks) or IM 709S (2-weeks)  
Geriatrics is available as an elective in internal medicine. An osteopathic physician must recognize the special needs of the geriatric patient. As aging is a normal physiological process; so the care of the geriatric patient is the normal extension of the physician's responsibility. Therefore, exposure to the geriatric patient should be an integral part of the experience of the student, particularly in the longitudinal care experience and the internal medicine rotations. Training should take place at all the training sites, the hospital, nursing home, the patient’s home, a geriatric assessment unit, or any other site appropriate for the care of the geriatric patient.

Global Health – ELEC 703  
The rotation provides broad exposure to both public health and direct clinical experiences in a variety of settings, both within the US and abroad.

Gross Anatomy & Basic Neuroanatomy – ANAT 505, 506  
This combined lecture and laboratory course introduces students to the normal macroscopic structure of the human body, including the brain and spinal cord. A regional approach is taken, whereby all structures within a body region are studied together, with an emphasis on functionally and clinically relevant anatomy and neuroanatomy. In laboratory, students collaborate in small groups to complete a thorough cadaveric dissection, including dissection of the brain and spinal cord. Normal radiologic anatomy is integrated into each regional topic.

Hematology/Oncology – CLIN 625  
This course is designed to assist students in acquiring knowledge and competency in both the basic and clinical sciences, in disorders of red and white blood cells, hemostasis and oncology. The faculty will emphasize pathology, pharmacology, internal medicine, immunology, clinical manifestations, diagnosis, differential diagnosis, and treatment components in the forms of lectures, directed self-study, and clinical integration learning sessions (CILs).
Hematology/Oncology – IM 710 (4-weeks) or IM 710S (2-weeks)
Hematology/Oncology is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Hospice - Palliative Care – FM 703 or IM 714 (4-weeks) or FM 703S (2-weeks)
Palliative Care is available as a subspecialty elective in the area of family medicine or internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in specialty. This rotation provides exposure to treatment and care of end of life patients.

Infectious Disease – IM 711 (4-weeks) or IM 711S (2-weeks)
The study and management of infectious disease is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Intensive Care – IM 716 (4-week) and IM 716S (2-week)
The intensive care rotation is meant to give the student a more in depth experience in a hospital intensive care unit. The student will work as part of an intensive care team. To accomplish this, the rotation provides broad exposure to both chronic and acute problems, experience in appropriate consultation, outpatient diagnostic testing, patient education and other procedures. To achieve rotation objectives, the student is expected to apply the concepts of diagnosis and management for all phases of care and, if relevant, develop a working knowledge of both inpatient and outpatient treatment modalities as applicable to discharge planning. Throughout the rotation, students will assume as much responsibility for patient care as is commensurate with his/her preparedness.

Internal Medicine – IM 701, 702 (4 to 6-weeks) or IM 701S, IM 702S (2-weeks)
An internal medicine core rotation is required. The specialty of internal medicine consists of the diagnosis, treatment, and prevention of all diseases of the body (excluding surgery and obstetrics) with emphasis on the internal organs. The program goal for the student in internal medicine is to develop the skills of thorough history taking and physical examination with the subsequent ability to develop a differential diagnosis. These skills will be developed and critiqued by bedside teaching and by a variety of academic lectures. Emphasis will also be placed on the effective utilization of hospital services and the development of post-hospitalization treatment plans. This rotation may include hospitalist programs affiliated with core sites.

Internal Medicine Sub-Internship – IM 801
The purpose of this four-week experience is to provide the student with exposure to commonly encountered cases in Internal Medicine Sub-Internship. To accomplish this, the rotation provides broad exposure to both chronic and acute problems, experience in appropriate consultation, outpatient diagnostic testing, patient education and other
procedures. To achieve rotation objectives, the student is expected to apply the concepts of diagnosis and management for all phases of outpatient care. If relevant, develop a working knowledge of both inpatient and outpatient treatment modalities. Throughout the rotation, students will assume as much responsibility for patient care as is commensurate with his/her preparedness.

Military Medicine – FM 706 (4-weeks) or FM 706S (2-weeks)
The purpose of this two- to six-week rotation is to provide the student with exposure to experiences related to military medical officer obligations in peacetime, leadership/discipline, disasters, stabilization/field exercises, triage, and combat medical environments. To accomplish this, the rotation provides broad exposure to professionalism and ethical issues in the military environment as well as in the medical field and where appropriate exposure to medical problems related to military members as well as their families can occur. To achieve rotation objectives, the student is expected to apply the concepts of diagnosis and management for all phases of patient care and, if relevant, develop a working knowledge of both inpatient and outpatient treatment modalities as related to military medical care in both peacetime and the combat environment.

Multi-Systems – CLIN 631
This course focuses on complex disease states known to afflict rural and medically underserved communities using a case-based content delivery. Diseases addressed include obesity, diabetes, HIV/AIDS, autoimmune disease and other multi-system syndromes.

Musculoskeletal & Integumentary System – CLIN 504
This course is an integrated, multidisciplinary study of the musculoskeletal and integumentary systems in health and disease. Emphasis is on pharmacology, pathology, nutrition, and microbiology as related to the diagnosis and clinical management of musculoskeletal and integumentary disorders.

Neonatology – PED 705 (4-weeks) or PED 705S (2-weeks)
Neonatology is available as a subspecialty elective in the area of pediatrics. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Nephrology – IM 712 (4-weeks) or IM 712S (2-weeks)
Nephrology is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Nervous System – CLIN 628
The Nervous System course is provided as a requirement of the second year curriculum. The course presents a multidimensional approach to the understanding of the most common clinical disorders of the nervous system. Additional topics are
physical examination principles of nervous disorders. Attention will be given to diagnosis, pathophysiology, treatment and outcome measurement. Several of these sections are conducted in workshops/laboratories format, allowing maximum participation and interaction of students and faculty.

Neurology – IM 713 (4-weeks) or IM 713S (2-weeks)
Neurology is a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty. The purpose of the rotation is to develop decision-making cognitive skills and apply didactic material in a clinical setting. Upon completion of this rotation, the student should have improved basic skills in physical diagnosis, gained familiarity and ancillary diagnostic procedures, determined indications for appropriate laboratory and diagnostic tests, and assisted in the management of neurologic problems.

Newborn Elective – PED 707 (4-6-weeks) or PED 707S (2-weeks)
The purpose of this experience is to provide the student with exposure to the development of the newborn from the perspective of a physician and parent. This rotation is not intended to transform the student into a pediatrician, but rather it is to provide the clinical clerk a survey of neonate development. In this ambulatory rotation, the student is encouraged to apply concepts of diagnosis and management to infants. In addition, the student will gain knowledge about normal growth and development of the pediatric patient. The student will be required to submit a daily log of infant development and a paper, agreed upon by the Chair of Pediatrics and the student.

Ophthalmology – CLIN 607
The Ophthalmology course is provided as a requirement of the second year curriculum. The course presents a multidimensional approach to the understanding of the most common clinical entities in ophthalmology. Additional topics are signs, symptoms, diagnosis, treatment, and the Biopsychosocial aspects of eye disease.

Ophthalmology – SURG 704 (4-weeks) or SURG 704S (2-weeks)
Ophthalmology is available as a subspecialty elective in the area of surgery. Students will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Orthopedics – SURG 705 (4-weeks) or SURG 705S (2-weeks)
Orthopedics is available as a subspecialty elective in the area of surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Osteopathic Principles & Practice I – OPP 501, 502
Osteopathic Principles and Practice I is a combined lecture and laboratory course comprised of formal didactic lectures (cognitive component) in an amphitheater setting and clinical skills training (CST, psychomotor component), including Osteopathic Manipulative Treatment (OMT, psychomotor component), conducted in a
large teaching laboratory setting. Skills and knowledge are taught and examined in a cumulative and comprehensive manner. The course will familiarize students with the history of osteopathy, the philosophical basis of the profession, and the anatomical and physiological foundation of osteopathic medicine in the treatment of somatic dysfunction relative to disease processes. Students will be taught how to palpate both male and female anatomy with the goal of diagnosing somatic dysfunction of soft tissues, bones, and joints, how to understand the biomechanics of the various components of the neuromusculoskeletal system, as well as how to manage their treatment. Student will be taught how to integrate osteopathic principles with clinical medicine in a wide variety of specialties, including family medicine, pediatrics, internal medicine, gynecology/obstetrics, and general surgery.

Osteopathic Principles & Practice II – OPP 601, 602
Osteopathic Principles and Practice II is a continuation of OPP I that builds upon the first-year knowledge base, while challenging students to apply their training in a more complex clinical care situations during year two. Osteopathic Principles and Practice II is combined lecture and laboratory course comprised of formal didactic lectures (cognitive component) in a lecture hall setting and clinical skills training (CST, psychomotor component), including Osteopathic Manipulation Treatment (OMT, psychomotor component) conducted in a large teaching laboratory setting. Skills and knowledge are taught and examined in a cumulative and comprehensive manner. The course will familiarize students with the history of osteopathy, the philosophical basis of the profession, and the anatomical and physiological foundation of osteopathic medicine in the treatment of somatic dysfunction relative to disease processes. Students will be taught how to properly palpate both male and female anatomy with the goal of diagnosing somatic dysfunction of soft tissues, bones, and joints, how to understand the biomechanics of the various components of the neuromusculoskeletal system, as well as how to manage their treatment. Students will gain an understand how to integrate osteopathic principles and practice (OPP) with clinical medicine in a wide variety of specialties, including family medicine, pediatrics, internal medicine, gynecology/obstetrics, an general surgery.

Osteopathic Principles & Practice – OPP 701 (4-weeks) or OPP 701S (2-weeks)
A four-week rotation required. Osteopathic education must play a key role in the curriculum. Training should be provided in both the inpatient and ambulatory care settings. In developing a format to teach these principles, it will be stressed that osteopathic care does not imply specific manipulative techniques for specific problems. Rather, this format should enable the student to integrate the osteopathic philosophy into daily patient care. The philosophy is centered on the concept of the body unity, the interrelationship of structure and function and the body's inherent neuropsychoimmunological healing capacity. The approach of the holistic medicine is one that will be emphasized throughout the extern program.

Osteopathic Principles & Practice III – OPP 799
The goal of this course is to instruct medical students in the basic understanding of Osteopathic Principles and Practices and anatomy needed for integration into clinical practice as they are prepared to be teaching assistants for first-, second-, and third-year osteopathic medical students. Emphasis will be placed on development of didactic and laboratory teaching skills to assist in preparation of first- and second-year students to become competent clinical practitioners in the context of osteopathic primary care. The student will also develop didactic skills and laboratory teaching skills in both OPP and Anatomy departments throughout this course through joint department effort.

Otorhinolaryngology – SURG 706 (4-weeks) or SURG 706S (2-weeks)
Otorhinolaryngology is available as an elective in the area of surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Pathology – SURG 709 (4-weeks) or SURG 709S (2-weeks)
Pathology is available as an elective in surgery. The goal of the rotation will be to study the use and limitations of clinical laboratory data for the diagnosis and treatment of disease. All divisions or combinations of the laboratory may be included. Students will observe and assist in the handling of surgical and biopsy specimens and the performance of frozen sections. They will also attend and participate in other teaching activities of the department at the discretion of the preceptor.

Pediatrics – PED 701, 702 (4 to 6-weeks) or PED 701S, PED 702S (2-weeks)
A pediatric core rotation is required. The goal of the pediatric rotation is to initiate the student into the field of working with infants, children, and adolescents. It is expected that the student become familiar with the diagnosis and treatment of common pediatric diseases and disorders. The student is expected to assist in the management of the pediatric patient under close supervision by the attending physician. The student’s responsibility in assisting with a particular pediatric case will depend on the individual’s experience and ability.

Pediatrics Elective – PED 704/704S
An elective rotation in the area of pediatrics. The student will be assigned to a physician trainer or a group of physician trainers who are practicing physician in their specialty.

Pediatrics Sub-Internship – PED 801
Students will serve as interns for pediatrics associated with residency programs under the supervision of residents and attending physicians. Students will be able to perform an initial assessment of pediatric patients under consideration for admission. Students will be able to implement diagnostic and therapeutic plans taking into account evidence-based information appropriate for pediatric patients. Based on their demonstrated knowledge in osteopathic medicine, skills, and attitudes, students will be able to participate on the pediatrics team with an advanced degree of independence.
and responsibility in preparation for their first year of residency. Students will learn to provide osteopathic patient-centered inpatient care and document that care appropriately. Students will be able to provide continuity of care to a limited number of pediatric patients who they care for in both the hospital and the ambulatory setting.

Physical Medicine & Rehabilitation – IM 727 (4-weeks) or IM 727S (2-weeks)
Physical Medicine & Rehabilitation is available as a subspecialty elective in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Podiatry – SURG 719 (4-weeks) or SURG 719S (2-weeks)
Podiatry is available as a subspecialty elective in the area of surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Primary Care Community Preceptorship – CLIN 619
The Preceptorship Program is comprised of clinical experiences designed to give the student an overview of the "real world" of medicine as it exists in the primary care physician's office. These experiences will allow the student to observe and participate in health care with a primary care physician. Primary care physicians include family physicians, pediatricians, and general internal medicine physicians. The student will complete two three-day preceptorships.

Pulmonary – IM 715 (4-weeks) or IM 715S (2-weeks)
The study and management of pulmonary disorders is available as a subspecialty elective rotation in the area of internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Radiology-Interventional – SURG 707 (4-weeks) or SURG 707S (2-weeks)
Interventional Radiology is available as an elective. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Renal System – CLIN 616
This required second-year course integrates histology, physiology, pathology, medicine, and the pharmacology related to renal diseases. The objective is to prepare the student to present a differential diagnosis and an appropriate diagnostic and therapeutic plan for patients with acute or chronic diseases of the urinary system.

Research/Scholarly Activity Elective – RSRCH 601
Students who are accepted to this course first will discuss possible research/scholarly activity topic areas with the faculty. The student then will search and evaluate the biomedical and scientific literature as they formulate the details of their project. After planning the project with the guidance of the faculty member, the student will perform the research, receiving instruction in appropriate scientific techniques by the faculty,
where appropriate. As the project nears its end, the student will compile the literature review, research design, and results and conclusions into a final report. This final report will serve as the foundation for a formal oral presentation of the project given to students and faculty at PNWU during the term following the student’s research experience. Students are encouraged to submit project abstracts for regional and national presentations.

Research - RSRCH 701
The purpose of this research elective rotation is to provide students the opportunity to experience research as it relates to medicine. Research topics are discussed with faculty of record with a clearly defined plan for the student to follow. Students then will search and evaluate the research literature as they formulate the details of their scientific study. After planning the research with the guidance of the research scientist or physician, the student will perform the research, receiving instruction in appropriate research methods by the faculty. As the project nears its end, the student will compile the literature review, research design, and results and conclusions into a final report. The length of this rotation can be varied to meet individual student preferences, and can be from 2-6 weeks in duration. Students are expected to commit 40 hours per week in the laboratory or office setting or conducting literature review for successful completion of this rotation.

Respiratory System – CLIN 512
The teaching program of this course has been designed to encompass the overall goals of the institution in assisting the students to acquire competency in clinical problems related to the respiratory system. This course is part of the year-one curriculum.

Rheumatology/Immunology – IM 717 (4-weeks) or IM 717S (2-weeks)
Rheumatology/Immunology is available as a subspecialty elective rotation in internal medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Scientific Foundations of Medicine – BIOMED 501
This 12-week, first-year course provides students with the scientific foundation they will use throughout the rest of the curriculum. Students will learn the structure and function of the human body’s most basic constituents and the roles these components play in normal body function and pathological processes. Major elements of the course include key concepts in molecular biology, biochemistry, embryology, genetics, histology, immunology, microbiology, neuroscience, nutrition and physiology with a special emphasis on integration, regulation and pathophysiology. The course also introduces students to concepts in pathology, laboratory and bio-molecular methods, and clinical case scenarios. Content is presented via lecture, lab, faculty directed study, and interactive learning sessions.
Sports Medicine – FM 705 (4-weeks) or FM 705S (2-weeks)
Sports Medicine is available as a subspecialty elective in family medicine. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Substance Abuse – BEHSC 702 (4-weeks) or BEHSC 702S (2-weeks)
Substance Abuse is a subspecialty elective in the area of behavioral medicine. In today's cultural setting, it is becoming increasingly important for practitioners to possess the clinical knowledge, skills and behavior necessary for the management of patients adversely affected by alcohol and other drugs, and to understand the specific issues related to HIV infection and cross cultural or gender differences.

Surgery – SURG 701, 702
A surgery core rotation is required. Surgery rotation(s) provide the student with adequate exposure to a variety of surgical procedures and to increase understanding of the pre- and post-operative needs of the surgical patient. The learning experience will be provided in the OR suite and at the patient's bedside. The attending surgeon will be responsible for providing instruction in a variety of different surgical techniques and for providing other pertinent information regarding the care of his/her particular patients. This rotation is open to all surgical specialties available at the core site.

Surgery Sub-Internship – SURG 801
The surgical sub-internship in surgery is meant to give the student who is interested in surgery a more in depth experience in surgery. The student will take on the responsibilities of a first year resident. In this capacity, he or she will see consults in the emergency room and on the floor, manage patients that have been admitted to the service, and assist in the operating room. This rotation introduces the student to general surgical principles including pre-op evaluation, intra-op decision making and post-op care. Students will deal with surgical illness, surgical critical care and non-operative care of the critically ill. Students should become “experts on the abdomen.”

Surgical Elective – SURG 712 (4-weeks) or SURG 712S (2-weeks)
Surgical Elective is available as an elective in the area of surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Surgical Selective – SURG 711 (4-weeks) or SURG 711S (2-weeks)
Surgical Selective is available as a subspecialty elective in the area of surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.
Trauma Surgery & Surgical Critical Care – SURG 710 (4-weeks) or SURG 710S (2-weeks)
The rotation provides the student with exposure to commonly encountered cases in trauma surgery and critical care. To accomplish this, the rotation provides broad exposure to both chronic and acute problems, experience in appropriate consultation, outpatient diagnostic testing, patient education and other procedures.

Urology – SURG 708 (4-weeks) or SURG 708S (2-weeks)
Urology is available as a subspecialty elective in the area of surgery. The student will be assigned to a physician trainer or a group of physician trainers who are practicing in their specialty.

Women’s Health – OBGYN 701 (4 to 6-weeks) or OBGYN 701S (2-weeks)
A required core curriculum rotation, the goal of the Women’s Health rotation is to acquaint the student with the field of female reproductive medicine and the broad-based issues surrounding women’s health. The student will be expected to demonstrate a basic knowledge of the social, physiological, and physical factors that make women unique. The student is expected to be able to identify the normal course of female maturation and development, including menarche, pregnancy, and menopause.

Women’s Health Sub-Internship – OBGYN 801
The obstetrical gynecological sub-internship is meant to give the student who is interested in OB/GYN a more in depth experience in the field of obstetrics and gynecology. Instruction for students will allow them responsibility and experience in caring for patients with obstetrical and gynecological problems. This instruction, experience and responsibility allows the development of judgment in clinical skills in utilizing and interpreting laboratory and diagnostic studies, and to rationally manage uncomplicated obstetrical and gynecologic patients. Instruction enhances the medical knowledge of the student in clinical physiology and pathology of obstetrical and gynecologic conditions. This instruction will include the natural history, prevalence, manifestations, differential diagnosis, and the rational therapeutics and management of the condition. Preventive and rehabilitative features for each condition are emphasized. The student will enhance their osteopathic patient care and management skills by learning the following: history taking, physical examination, diagnostic procedures, problem identification and formulation, recording of data, problem solving skills, and appropriate patient-physician and patient family relationships. In addition instruction will provide responsibility and experience for students, in patient education and health maintenance, specifically in the areas of marriage counseling, sex education, and family planning.
Wound Care – IM 707, 707S
The purpose of this rotation is to provide the student with an overview of the clinical specialty. This rotation is not intended to transform the student into a specialist, but rather it is to provide the clinical clerk a survey of the specialty.
UNIVERSITY PERSONNEL

ADMINISTRATION OF THE UNIVERSITY

D. Keith Watson, DO, President: The President of Pacific Northwest University of Health Sciences is the chief executive officer and has final responsibility for the administration of the University. The President reports directly to the Board of Trustees.

Robert E. Sutton, PhD MA, Senior Advisor to the President: The Senior Advisor to the President manages projects assigned by the President and provides leadership and oversight for key planning and implementation processes that impact the University.

Frank Alvarez, MPH, Chief Operations Officer: The Chief Operations Officer reports to the President and is responsible for the effective and efficient management and administration of the University’s non-academic operations.

Ann Hittle, CPA, Chief Financial Officer: The Chief Financial Officer is responsible for developing and overseeing all finance functions of the University.

Wendell Snodgrass, EMBA, Chief Advancement Officer: The Chief Advancement Officer is responsible for planning and implementing strategies designed to support PNWU’s mission and goals through fund raising, University relations, special events, communications, legislative affairs, and grants.

Bernadette Howlett, PhD, Chief Research Officer: The Chief Research Officer is responsible for ensuring compliance with research regulatory processes and research collaborations with other academic and clinical institutions.

COLLEGE OF OSTEOPATHIC MEDICINE

Thomas A. Scandalis, DO, Dean and Chief Academic Officer: The Dean is the chief academic, budgetary, and personnel officer of the College of Osteopathic Medicine. The Dean reports to the President. It is the duty of the Dean to establish the academic program as it relates to the mission of the College.

Mary T. Johnson, PhD, Associate Dean for Academic Affairs: The Associate Dean is responsible for curricular design, implementation, and assessment of academic programs.

Stephen D. Laird, DO, MHPE, FACOS, Associate Dean for Medical Student Affairs: The Associate Dean oversees extracurricular activities, including but not limited to, clubs, chapters, volunteers, service, student wellness and mental health. Residency applications and career counseling are also managed by Student Affairs.
Anita Showalter, DO, Assistant Dean for Clinical Education: The Assistant Dean is responsible for the administration of clinical rotations including oversight of adjunct clinical faculty, curriculum development, delivery and evaluation.

Assistant Dean for Pre-Clinical Education: The Assistant Dean is responsible for the administrative support and leadership of the pre-clinical curriculum.

Juan Acosta, DO, Assistant Dean for Post-Doctoral Education: The Assistant Dean is responsible for ensuring successful training experiences for postdoctoral residents by providing a supportive working environment and resources to prepare students for the next step in their careers.

The Regional Deans have instructional responsibilities in their areas of expertise.
