Graduate Medical Education Accountability Report
Academic Year 2017-18

Prepared by
PNWU-COM Department of Postdoctoral Education
200 University Parkway
Yakima, WA 98901

INTRODUCTION

Pacific Northwest University of Health Sciences (PNWU), a health care focused non-profit university located in Yakima, Washington, was founded in 2005. PNWU's College of Osteopathic Medicine (COM) has a mission to: (1) educate and train students to become health care professionals with osteopathic values, and (2) conduct research to facilitate the provision of quality care to communities of the Pacific Northwest, particularly rural and medically underserved populations.

The primary teaching goal at PNWU-COM is to provide a learner-centered curriculum that prepares students for graduate medical education and osteopathic clinical service. An essential aspect of the College's mission is the placement of all graduates into residency training programs of their choice. Medical students graduating from PNWU-COM can select the match systems in which they participate: military or civilian, osteopathic or allopathic.

As of July 1, 2017, PNWU developed its own infrastructure to replace the OPTI-West consortium for graduate medical education. This was done as the Postdoctoral Education Department has developed their own infrastructure, building a consortium of affiliated residencies within the Pacific Northwest. Utilizing new ACGME regulations and as a function of the Family Medicine Education Advisory Board (FMEAB), the Postdoctoral Education Department has seen significant growth in relationships with residency programs from Wyoming to Alaska. PNWU has additionally become the primary academic affiliate for regional residencies who have achieved or are seeking Osteopathic Recognition.

PNWU-COM's Department of Postdoctoral Education prepared the following report to present a summary of graduate medical education (GME) outcomes for the graduating class of **2018**, to include:

- PNWU's mission aligning with GME placement and development
- Description of the fourth and final year
- Description of the match
- Factors that influence match choices
- PNWU's match rate

COMMISSION ON OSTEOPATHIC COLLEGE ACCREDITATION

COCA Standard 10

The faculty of a COM must ensure that the curriculum provides content of sufficient breadth and depth to prepare students for entry into a graduate medical education program for the subsequent practice of medicine. The COM must strive to develop graduate medical education to meet the needs of its graduates within the defined service area, consistent with the mission of the COM.

REPORT METHODOLOGY

PNWU-COM's GME Accountability Report is prepared in compliance with the Commission on Osteopathic College Accreditation (COCA) Standard 10. The retrospective data is based on information reported by the COM in the American Association of Colleges of Osteopathic Medicine (AACOM) Annual Report, demonstrating that the COM's mission and objectives are being met. The report is distributed to PNWU faculty, staff, and students, and is publicly posted on PNWU's website: www.PNWU.edu.

This report presents the following data for Academic Year (AY) 2017-18:

- Number of graduates entering GME from the class of 2018
- Historic 3-year data:
 - Final placement numbers by match systems
 - Number and percentage of eligible students unsuccessful in match systems
- Class of 2018 residency program matches

Number of graduates entering GME from the Class of 2018

Data were tabulated from enrollment in the Electronic Residency Application Service (ERAS), the National Board of Osteopathic Medical Examination (NBOME), and the PNWU Registrar. A student was considered in the Class of 2018 category if they registered with ERAS, had passed or were scheduled to receive scores for all COMLEX exam requirements prior to June 2018, and the Registrar affirmed them as graduating by July 1.

Historic 3-year match system data:

Final placement numbers by match systems

This data was calculated from the official match reports generated by match systems, including the Supplemental Offer and Acceptance Program (SOAP) reports from the NRMP match system, and the list of all applicant matches from the National Matching Services system. These data were later affirmed by each student as part of the preparation of the official residency match list database as well as the Commencement Program. These data also illustrate the percentage of match participation by system.

Number and percentage of eligible students unsuccessful in the match systems

These values were calculated by subtracting the roster totals of the final placement numbers from the number of graduates entering GME.

Note: Match data was calculated by PNWU's Office of Institutional Effectiveness with raw data provided by PNWU-COM's Department of Student Affairs.

Residency program choices of the 2017 graduates

As confirmed by the criteria above, the list of matched programs is organized alphabetically by discipline, with match system, residency program name, city, and state provided. The program names listed reflect the accrediting agency listing as posted by the AOA on Opportunities (opportunities.osteopathic.org/index.htm) and the ACGME (www.acgme.org/acgmeweb/).
