

2024-25 OMS3 Financial Aid Budget Revision Request for Rotation Expenses Rotation Schedule

(Refer to **PNWU Clinical Rotation Resources** for Rotation Requirements and Scheduling)

The table below is to help you determine if your expenses for clinical rotations travel exceed the PNWU estimate (\$2272). All OMS3 students already have an extra \$2272 built into their cost of attendance for clinical rotations travel, so we can only consider costs exceeding that estimate. **Do not include expenses that have been covered by PNWU**, such as the housing allowance provided by PNWU for core rotations occurring more than 50 miles or more than one hour driving distance from where didactics are held **OR** the gas stipend that may be available should a student decide to drive to/from the rotation site that is 50 miles one way or one hour driving distance from didactics (see SharePoint/Clinical Rotation Resources/Site Pages/Reimbursement Requests for more information). Receipts or online booking confirmations are REQUIRED for airfare, lodging/housing, car rental, parking costs, taxi/subway, etc., and MUST show your name and the date(s). Screenshots without this information will not be accepted.

Maps are required for mileage requests. There is no reimbursement for meals.

Course #	Core Rotation	Location	# of Weeks	Start Date	End Date	Related Expenses							
							Mileage to Rotation Site*						
						Air Fare Cost	Miles driven one way	# days per week	# of weeks	Car Rental Cost	Extra Housing Cost	Other (itemize)	

^{*} If you wish to have your mileage considered, you must provide a printout of an online map showing the starting address and the ending address, along with miles driven. Keep in mind that according to SharePoint Reimbursement Requests, a "gas stipend may be available should a student decide to drive to/from the rotation site that is 50 miles one way or one hour driving distance from didactics." PNWU reimbursement is a MUCH better option for you to investigate rather than taking out additional loan.
